Business summary **One dies USX** to 70 hurt spin off in Israeli chemicals blast unit

One person was killed and sbout 70 were wounded when three hand grenades were thrown at a crowd of Israeli soldiers and their relatives including children near Jerusalem's Wailing Wall, Judaism's holiest site, police said.

The grenades were thrown as new recruits from the elite Givati infantry brigade and their parents were boarding buses after a military ceremony

Meanwhile, the planned job swap between Israeli Prime Minister Shi-mon Peres and Foreign Minister Yitzhak Shamir was postponed indefinitely after a second meeting in two days failed to solve disputes over cabinet appointments.

Challenge to Aquino

The ruling coalition of Philippine President Corazon Aquino splin-tered further when her Vice President Salvador Laurel said he would field his own candidates in a general election expected in May.

iraq attacks aircraft

Iran said Iraqi military aircraft attacked an Iranian Boeing 727 on the ground at Shiraz, south of Tehran, as passengers were disembarking, killing three people.

Turkish cabinet guits

All 21 Tarkish government ministers presented their resignations to Prime Minister Turgut Ozal to pave the way for a cabinet reshuffle likely to be announced tomorrow.

Ershad wins

An overwhelming victory in Bagladesh's presidential election was assured for Lieutenant General Hossain Mohammad Ershad, the country's military ruler, when ballot rig-ging produced a high poll thought to be more than 50 to 60 per cent even though the actual turnout of voters was little more than 10 to 15 per. cent. Page 6

Deregulation of local US phones urged

BY WILLIAM HALL IN NEW YORK

MR Mark Fowher, chairman of the competition in long-distance tele-Federal Communications Commis-sion (FCC), the primary regulator of breakup of AT&T should be mir-Federal Communications Commis-sion (FCC), the primary regulator of the US telecommunications indus-try, has called for the complete de-regulation of local US telephone services and the elimination of local absidies.

The proposal, which has been floated in an article in the Federal communications Law Review, could have as dramatic effect on lo-cal telephone services in the US as the breakup of AT&T in 1982 had on the long distance US telephone services. It would open the door to a plethora of new competitors and services at the local level.

Mr Fowler used a similar article

cautious approach of the Shell group to international politics. Mr van Wachem wrote the letter to rebut some of the "misrepres tations and the deliberately false nature of many of the accusations"

reassure bankers By Philip Stephens in London MR NIGEL LAWSON, the British Chancellor of the Exchequer, will tonight set out to reassure the world's financial markets that this week's rise in UK interest rates was adequate to steady the pound and

Lawson

plans a

message to

adequate to steady the pound and to prevent a resurgence of inflation. He will deliver the message amid the ritual formality of the annual bankers' dinner in the City of Lon-don's Mansion House, traditionally one of the leading events in the UK's financial calendar.

The speech will round off an odd week for Mr Lawson. Last Thursday, he received an unusually warm reception from the Conservative Party faithful at what could be their last annual conference before the next general election.

The rumours quickly spread that perhaps he was now joining the half-dozen or so contenders for the party leadership - and in the event of an election victory the job of Prime Minister - when Mrs Margaret Thatcher finally steps down.

Five days later Mr Lawson was forced to order the politically em-barrassing rise in interest rates in response to the latest crisis of confi-dence caused by the pound's recur-rent slides on foreign exchange

The signs yesterday were that the markets remain sceptical that the resolution of Mr Lawson's pledge to the party conference that he would "never, never take risks with inflation" will in practice con-tinue to be matched by action.

First though, the politics, Mr Lawson yesterday acknowledged in an interview with the Financial Times that be had made a special effort at the conference. But that did not mean he was throwing his hat into the ring for the party leadership.

"I have no ambition in that direction ... the job of Chancellor has always been my ambition." he said. It is that limit to his ambition that explains why Mr Lawson has not sought the political base in the Con-servative Party so cherished by oth-

the experiment, local telephone companies would be permitted to raise or lower rates and enter new Lawson is openly distantial of many of his fellow Conservative MPs in the House of Commons. His political advisers constantly urge him to spent more time cultivating the so-called backbenchers. But although a disastrous performance at the party conference in 1984 has persuaded him to take those events much more seriously, he still finds it hard to disguise his impatience with those be regards as on a lower intellectual plane.

EURO-COMMISSION ECONOMIC REPORT RENEWS PLEA FOR CO-OPERATIVE STRATEGY Italian metalworkers EEC states 'must boost growth'

BY QUENTIN PEEL IN BRUSSELS

MEMBER STATES of the ERC are failing to take full advantage of the improvement in the international economic climate, and must boost their combined economic growth rates to make a significant reduction in unemployment. That is the conclusion of the an-

nual economic report of the European Commission, published yesterday, which renews its appeal for a "co-operative growth strategy" to co-ordinate the macro and micro- growth. It also underlines the need for

economic policies of the 12. The report criticises the individu-al governments for failing to pro-mote a genuine "social dialogue" between employers and trade unions, to ensure a higher rate of private investment is matched by continuing moderation in wage growth. On present trends, the Commis-

sion says, unemployment in the Community will still top 10 per cent in 1990 - which is "an unacceptable the radical improvement in the Community's external terms of prospect." The member states must boost the likely average economic growth rate of 2.7 per cent per year trade - the price the EEC pays for to about 3.5 per cent - and thereby bring the rate of unemployment down to about 7 per cent. In spite of the widespread acceptof the dollar. The magnitude of that change is unprecedented in post-war history, and its effect is still un-

predictable ance of the same policy prescription by member states and the other European institutions last year, not enough has yet been achieved, the

ission says.

This year it calls on the 12 gov- ing-the major factor underplinning ermments to report back to each current economic growth - rising other by May next year on what by an expected 3.7 per cent this they have done to implement the year. strategy. EUROPEAN NEWS

David Buchan reports on fresh evidence of Moscow's progress in laser development W. German Beam of light on Soviet Star Wars research

WEST GERMANY'S net foreign wEST GERMANY'S net foreign assets heve more than doubled since the end of 1983 as a result of its soaring surpluses, and the country has become one of the world's biggest creditor nations, the Bundesbank said. At the end of June this year,

deploy a Star Wars missue defence. Yet, by an extraordinary irony, at the very time world attention is focused on the Strategic Defence Initiative (SDI) as the biggest and per-haps the only obstacle to nuclear peace, new light bas been thrown on comparable Soviet efforts in Star Wars tech-nology. At the end of June this year, Germany's net foreign assets stood at DM 183bn (\$83bn at the then exchange rate) com-pared with DM 158bn at the end of 1985 and DM 88bn in 1983.

Up to now, the world has Comparing figures for the end of last year, the West Ger-man central bank found that West Germany, with net foreign assets then of around \$71bn, was surpassed by only Japan (with \$130bn of net external assets), the UK (\$116bn), and Switzerland (an unofficially estimated \$100bn). depended on glossy brochures from the US Defence Depart-ment for its knowledge of Soviet research and development of ballistic missile defence. These ballistic missile defence. These publications have given much detail, but for understandable reasons, no sources. They claim, inter alia, that 10,000 Soviet. scientists and engineers work on the Soviet laser programme, but none of these bave emigrated or defected to tell the West about it. This was apart from such oil-

producing countries as Sandi Arabia and Knwait for which exact figures are not available, West about it. It now appears however from secret internal Soviet doco-ments reaching the French ments reaching the Franch Government that as long ago as 1979-80, three to four years before Mr Reagan made his famous Star Wars speech, that the Soviet Union was combing the West for technology to incorrowate into the develop

"ONLY A MADMAN," said Mr Mikhail Gorbachev et the close partial admissions have been of the Reykjavik summit, would have accepted President Ronald Reagan's proposal that the US be free to test, develop and, at the end of 10 years, possibly defence. Yet, by an entrordinary irony, at the very time world attention is focused on the

warning, reconnaissance, com munication and navigation systems."

effort

General Nikolai Chervov of the general staff went e little further a year ago. He admit-ted to the existence of some experimental lasers, but said they were "weak" and designed to "locate and deter"" sa*allites.

Marshal Sokolov Space But the documents speak of research conducted

for 1979 and 1980) by the Military Industrial Commission (VPK by its Russian minute) to the Soviet Government.

But the documents speak of programmes, run in come cases directly by defence-related ministries, to produce "an effective anti-missile defence for our country," e high-powered Soviet laser being designed for space," chemical lasers and various "powerful" to the Soviet Government. The VPK has two roles—to co-ordinate arms production and to supervise the collection of foreign technical intelli-gence and its incorporation into military research and development lasers for use on board military aircraft. This, at least, suggests development.

shat the Soviet Union's top military men have been rather modest in public pronounce-ments about their research development. Written reports accompany each stage of the bureaucratic process, covering which VPK tasks are allotted to which These internal edmissions about Soviet Star Wars efforts have been thrown np in e for-tuitous chain of events that intelligence services, how suc-cessful those agencies are in fulfilling the tasks, and how useful VPK member ministries and enterprises judge the foreign know-how or samples to (Technology) of his agency.

be. It is among a mass of VPK reports on this last stage (utility assessment) that there are a few talling references to Star Wars type programmes. No sweeping conclusions can be drawn from the material. It welter of documentation on Soviet technical

vocumikh iselyakh in the This baul of documents from does not prove the Soviet Union Russian). Farewell, who is believed to has violated the 1972 Anti-Now, despite the general have been arrested after late Ballistic Missile (ARM) treaty. impression that the Soviets 1982 and probably executed. That agreement limits each have flatly denied any space- contained two annual reports superpower to protecting only

and commuter sovereignty in the broadest sense. Par-ticularly in this country, the consumer is sopecard between big business and government. If a retailer interprets what the consumer whots in every single aspect—parking, out-of-town atores, wide hours, caring for ancial needs, getting involved with communities, fighting in the political and social antisa—only then will be appreciate what consumer sovereignup really means.

sovereignty really means. That is how we ve built our business. People want to live in a society where their children can grow

to ave in a society where their children can grow up in peace; where they can buy food at the lowest price possible. Therefore, if one attacks these is-ness, one is fighting for the consumer.

Spine There's here e fair bit of scepticing over

Acharonaux You'll always get the cycles who'll say it's a great marketing stand almost solely at getting the business. Two never pretended that Fm not in

the business. I've never pretended that I'm not in business for profit. But I gammely believe that retailing is a calling and if the this as my mission, in hit profits will flow. Profits have grown and we've become the biggest because of that drive. That's my, answer to the cynics. It's philosophy that's good for the community and good for the country — and it works.

Spira: Now are restricted in the range of liquer you can sell. In this a scribest impedimentant are there other areas you are artificially restrained. Areas extering?

Achermann: It is an impedienced but indocan't worry-ms terribly much. I'd obviously like to be in the wider liquor field but, being in the food business, I haven't prashed the liquor side hard because it doesn't have the same consolution for the consumer as food does. We're in the wine business in 35 of our 90 onlies. We'l like to have liquor in every one of our relies have are marticled by the have within

of our outliets but we're restricted by the lase which

of our outlets but we're restricted by the lawy which protect the smaller liquor trader and the hotels. On the wider front, besides the liquor impedi-ment, there's price protection on one other item only and that's petrol. We've fraght raging buttles. We've won some and lost some with the government and the oil companies. We've won round nine and lost round 10, which prevented us from cost catting.

Round II is coming up shortly, so it's far from

Spira: What is your philosophy toward South Africa's neighbouring countries?

Ackermann: We'd like to push our expertise hab Zambia, Zimbebwe and Angola if politics allow. That's a natural development for us, because those countries despendely need modern marketing. But because of political circumstances we've been un-able to do so and that is why we've had to look

OVERSEAS.

missile defence system. The reference to research into "anti-missile defence for our country" (strano in the Russian) suggests an eventual intention to breach the 1972 geographical limitations on ABM defence, just as the US has publicly recognised that actual deployment of a Star Wars system would entail scrap-ping, or totally rewriting, the

ping, or totally rewriting, the 1972 pact. The ABM treaty permits some research, even into systems based on new physical systems based on new physical principles. Just how much research was the key Reykjavik dispute. But the Farewell material suggests that the Soviet Union has been doing rather more than the laboratory research to which it now wants to comfine the US. to confine the US.

The Farewell documents show the main source of Soviet acquisition of Star Wars-type technology was the US, the main collector was the KGB, and the main area was lasers. There appear to be three Soviet laser programmes. The first involving ground-based lasers, has probably been going loogest, principally at Sary Shagan in central Asia, known for many years to be the chief Soviet range for traditional ABM testing.

ciation, identified in the Fare-

well papers as the ntiliser in 1976-77 of foreign "samples and technical documentation relating to precision machining of metal-optical surfaces." These are the mirrors needed to concentrate laser beams to a weapon-strength intensity and

to steer on to the target. Astrofizika, which comet mder the Ministry of Defence

one site (Moscow in the case defence-related Soviet mini-of the Soviet Union) with a stries), was also eited as the missile defence system. The reference to research chemical lasers

3

The Soviet airborne laser programme, paralleling a well Dublicised US one, seems recently to beve suffered e set-back with the destruction by fire on the ground this year of an airborne laser laboratory inan airborne laser laboratory installed inside an IL-76 trans-port aircraft.

But several years before (in 1979) the Institute of Atomic Energy claimed to have gained from US experience in its study of the optimum weight and dimensions for space and for military aircraft of "a series of

lasers from 1.5 to 10 MW" The probable purpose of the airborne laser programme, Western experts believe, is to study the performance of lasers in the upper etmosphere (where laser beams diffuse less) without launching a

costly spececraft for every experiment.

The Forewell documentation identified the Energies scientifie production association as active in chemical lasers as well as the Soviet shuttle programme. The documents cite

dividuals. But it must be of some considerable advantage for Mr Gorbachev to have on his negotiating team, at Reyk-Western experts believe it javik and elsewhere, Mr Yev-may be linked with the Astro- geni Velikhov, whose role as fizika scientific production asso- deputy director of the Institute of Atomie Energy has given him e thorough grounding in lasers

Two other senior edvisers on laser technology ere of note-Mr Alexander Prokhorov and Mr Nikolai Basov. In 1964 they shared with an American the Nobel Prize for Physics-an indication that the two superpowers were then level-pegging in laser technology. They still may be today.

Organic growth through partnership and social commitment

Raymond Ackerman, chairman and founder of Pick 'n Pay Stores, talks to John Spira, Finance Editor of the Johannesburg Sunday Star.

is buying less of our wine. We should be encouraged to bell wine, not discouraged from doing so. Fur-ther, the price fixing that goes on in the industry af-fects the price at which we are able to sell wine and this, in torm, has a drastic adverse impact on the

Spira: We have diversified geographically in Australia, How is this venture progressing ar do you have expansion plans there or elsewho ing and in the workd?

Actorman: Our first foray into Anotralia (in Brishane) has gone well but we've been stopped in our tracks because the unions, aided and abened by the ANC and SWAPO, prevented us from going in for our second stort in Melbourne on the grounds that we had an Astralian partner, we weren't able to get that store off the ground. We only went into Anstralia because we didn't want to overstore in South Africa and because the Australians were lagging behind us in experise. It was to be an experimental move preparatory to our attacking one of the big markets in the United States or Europe.

or Europe. If we continue to be blocked in Australia, we'll

If we common to be notified and we have simply have to go clacawhere. It's ironic that we have this problem in Anstralia, since we've shown them what we've done on non-discrimination and that we've been one of the leaders in fighting for fairer rights for blacks in South Africa.

Spira: What role can Pick 'n Pay and business in general play in creating e fairer society in South Africa?

South Africa: Ackerman: The role we have played is in persond-ing government to allow us to operate on a fair em-ployment basis — in other words, promoting on merit. Thus, 56% of our management in the Western Cape is either black or coloured. That's higher than any American supermarker chain. We've also been instrumental in getting the government to change the laws on housing, where we, as the business community, through the Urban Foundation and other offices, have got the governe-ment to allow a 99 year lease for blacks to hold land and (latterly) freehold rights. We've also been strongly behind the change in the citizenship laws and the pass laws. We still have an commons role to play in the next phase, which is the possible imposition on South Africa of mandatory sonctions. Here, we must en-sure thave run our business on the grounds of fair employment practices, promotion from within and.

sure unit we run our business on the grounds of fair employment practices, promotion from within and, oven reverse discrimination. We must strive to get rid of legislated apartheid. As much as 95 % of South Africa's business com-munity is in favour of total abolition of apartheid and getting black leaders around the table. We are try-ing to facilitate that by having meetings with black leaders right now.

ing to facilitate that by having meetings with black leaders right now. The neocomaged by my meetings with black lead-ers insofar as they are not asking for total revolu-tion. There are some very fair minded black lead-ers and if we can facilitate gasting them to meet with the government to sort our a democratic, non-acial South Africa, business will have performed a cru-cial function. We must also strive for meaningful minority rights protection, as a crucial basis for power-sharing.

Spira: What is your attitude towards sanctions

Ackerman: The fact that the business community

And King, who refused to accept the resignation of Prime Minister Wilfried Martens on Tucsday, will be using his in-fluence to persuade the parties to settle their differences over the so-called "Happart affair." The four-party centre-right costition of Christian Democrats and Liberals is split over what to do about Mr Happart, the former mayor of a Flemish commune whose election was recently annulled by the quasi-judicial Council of State on the grounds that be refuses to learn dequate Flemish

The King spent much of yesterday talking with the Socialists and other opposition parties but the main chance seems to lie in patching up the disagrement between the French and Flemish speaking wings of the Christian Democrats.

GULF

Spira: With your retailing portfolio of 31 hypers, 82 angermanischund 12 garages, you are the har-gent naar mar loters in South Africa, Have you reached a point of mutation?

Acherman: We've a lot of growing to do yet. We haven't tried to be the biggest; rather, we've tried to achieve volume per order. Even with the big num-bers you 've mentioned, we still only have approx. half the number of stores of the two other major chains, yet we are approaching 2,5 billion Rand

tantiovie. Corscope for growth lies in two meas. One is in the black areas, although we don't want to go into the black areas unless the blacks scally want to the We are trying to get partners in the black regions and are beginning to succeed. Many black areas need food at low prices but the process of achiev-ing this chiefful many tark to be an in a shick are part ing this objective must not be one in which we put blacks out of business. This is why we're going for

partnerships. The second growth area isomong South Africa's while communities where we feel we can establish three or four stores a year over the next four or five

So we have the potential for a lot of organic growth within South Africa. Further, we have a new for-met up our sloeves and this we shall be announceing shortly.

Spira; Howe you actually succeeded in acting up black partnership operations:

Achtersman: Yes. We have one in Cape Town, where we have a 49% partnership state in a store at Misch-ell's Plain. The remaining 51% is owned by the lo-cal community. It's been astronety successful. A second such operation is in the Cashei, where, although we have 200% ownership, this has been at the express request of the Ciskei government. Next year we'll be starting a similar venture in Bophutatswana. We're also working on something in or near Soweto.

The black public needs us. But there's a strong feeling that the black trader needs a fair chance to participate, so we have to trad carefully.

Spira: Would you experience problems other than competing with the black trader in going into Soretic?

Ackerman: Yes. There are legal proble although they're not as onerous as they used to be. If we were to hold 49% and the black community the balance, that would be accept

Spira: You have financed growth malely without cash calls on shureholders or rising debt. In fact, berrowings as a percentage of shureholders' finade are the lowest they've ever been. How has this been done?

Ackernan: It's not all thet clever. Worktwide, big ACCEPTIBLE IT STOLET USE CEVEY. WURAPPULE, OU retailers like conselves are essentially in the cash flow business. We sell our goods and only pay our suppliers a mosth later. Thue, we have manufalled our funds very carefully and although we're in cer-tain non-food lines which turn slower than flood, we

where to concentrate on food. We try to ensure that we achieve as much profitability as we can to build more stores and employ more people, simultaneously looking after our customers.

Spira: You've frequently been referred to as the champion of consumerism in South Africa. What does this mean in e practical sense?

Acherman: It isn't just e nest cliché. To me it me-

Raymond Ackerman Spira: Could you spell out the political jurdle?

Adversion: Four of nationalization, because many of these countries burder on a mixture of socialism. Further, there's the political autagonism towards South Africa, even though they are so dependent.

on us economically. I'd love to ace a united states of Southern Africa, I'd love to ace a united states of Southern Africa, I'd love to not a united states of Southern Arnes, which could be a powerful force to rivel the EEC, the United States of America and Asia, it'll come — surely as night follows day — and, hopefully in our lifetime. It as goal that we businessmen should be fighting with the politicians of Southern Africa to achieve, because they're going to rum it unless we show them that the economic forces should be

Spira: You have long criticised South African control hourds and restrictive practices. Are your please being headed?

Ackernance: In some ways, yes. There's more talk of privatisation and the control boards are growing increasingly orientated towards private enterprise

increasingly orienteed towards private enterprise than formerly. Of counts, most countries protect farmens; and I don't disagree with the principle. Farmens should be protected from the vagaries of nature. We nevertheless have too many boards in this country. Fortunately, the boards are starting to work more closely with the private sector. For example, I was asked to strend a special investigation into the wheat and bread industry. But it's still very much a mooo-polistic force, which can do with a lot more efficiency.

polisic some, which can do wan a net appre-efficiency. Some of the private sector's pleas are being heed-ed. For example, when there used to be a surplus of buins it was exposed at a loss. Now, they be com-ing to us, the major chains, and asking us to bring prices down and work on lower margins and pro-mote. So we're actually working with them to get of or morthese. rid of suspluses.

Spira: You've referred to monopolistic forces in the control board context. But much of South African industry is also showing monopolistic teadencies. How has this affected Pick 'n Pay?

Ackerman: We've always tried to fight monopo-lies and I must say that the government is gening tougher as far as monopolies are concerned. The problem is, the government itself is guilty of collu-sion by operating a cartel with the oil companies on the petrol price. Nevertheless, it is becoming in-creasingly difficult to become a monopolies has car-tamily helped to break down a lot of the price fixing agreements. 2017

As far as Pick 'n Pay is concerned, we have cer-As an as not a Pay is concerned, we have car-tainly been affected by the monopoly in the wine industry, where we've been provented from having more than 35 wine licences in order to protect the wine industry. This is ridiculous, because the world

Ackerment: The fact that the business community is in favour of disamating spartheid does not mean that we are in favour of sanctions. Quite the con-traly, we are totally opposed to stations. I wish the world leaders, who are coming an off with boycons, would realise that we are living in South Africa. And when you live here and see the poverty around you (as I've seen), then you appreciate just how damag-ing boyconts and sanctions can be to the people they're supposed to help. The same applies to disinvestment. An example. Certain supermarkets in Britain have

100

An comple. Certain supermarkets in Brinan have stopped buying our produce, in the process caus-ing unemployment. The immediate effect is that hundreds of very poor coloured people come to the back doors of our stores, begging for food. We ve established two soup kitchens as a result. And all this because of the moralistic approach of certain companies not buying South African goods. Our role in the next couple of years — while view to avoiding massive unemployment in this contury — is to literally go to every single company with which we're involved and show them the effects of sanctions. We, the business community, must show then that sanctions are not the peaceful option ther Bishop Tutu claims they are. Sanctions are evil, de-bilinging and they won't move the government.

When this present frenzy has run its course - and it's beginning to do so - the world will hopefully back off on sanctions,

Congress set to pass bill on illegal aliens

BY LIONEL BARBER IN WASHINGTON

LANDMARK immigration bill, containing the biggest changes in US law for at least 20 years, is near final approval by Congress.

The bill would grant an amnetsy to several million illegal aliens in the US and impose penalties on employers who hire illegal allens in the fature.

Congress has wrestled with the issue for reform has been building up as the number of illegal aliens grew. The US Government estimates

that 8m to 10m illegal aliens live in the US and 6m attempt to enter each year. Stemming the tide proved difficult be-cause farmers in the west argue they need casual labour for the harvest. Minorities, particularly the Hispanic lobby, have also fought against any appearance of discrimination.

are compromise package agreed on Tuesday by repre-sentatives of the House and Senate strikes a balance between the various interest groups while ettempting to discourage employers from hiring cheap and illegal labour.

By Stewart Fleming, US Editor. in Washington THE growth in car sales since late The package has been sent for final approval this week to the Senate and House. If it gets clearance, it must be signed by summer triggered a record monthly rise of 4.6 per cent in the President, who has ex-pressed support for reform.

growth

bloated stocks.

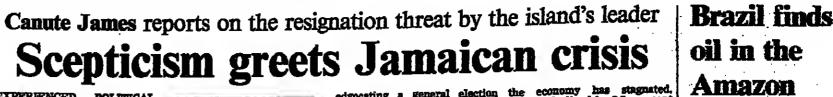

Under the bill, employers would be subject to civil penalties ranging from \$250 to \$10,000 for each illegal alien they hired. The number of illegal aliens who are likely to benefit from the amnesty is unclear, but estimates range between 1m and 5m.

If tha bill becomes law, employers will have to ask all job spplicants for documents such as a passport or driver's licence. But the bill evoids the earlier controversial pro-vision for national identifica-tion cards.

The House of Representatives at this week's meeting dropped a provision which would have let penaltiesc against employers of illegal aliens expire after six and a half years. This pro-vision had been criticised as

EXPERIENCED POLITICAL EXPERIENCED POLITICAL observers in Jamaica may be fongiven their scepticism at this week's political crisis in the island. The crisis follows the announcement by Mr Edward Seaga that he intends to resign the Prime Hinister-ship Pert August after stee ship next Angust, after step-ping down next month as leader of the conservative Jamaica Labour Party. CONTINUING strong

the Commerce Department's monthly estimate of retail sales in September. But without the Mr Seaga himself has con-tributed to the observers' tencar component retail sales rose A big jump in the retail sales figure had been anticipated on Wall Street--private economists had estimated the gain at be-tween 2 per cent and 4 per cent. But most doubt that the gain significantly changes their expectation of s continuation of the sluggish pace of economic

In seage numeric has con-tributed to the observers' ten-dency to put a more complex interpretation on his action, for he has done it before. In 1979 he resigned the leader-ship of the party, then in oppo-sition, after disagreements with the party chairman. He with-drew his resignation shortly afterwards when the chairman submitted his own resignation. Senior members of the JLP say with some conviction that they have no doubt Mr Seage will change his mind and suggest that the intended resignation is something of e tactical retreat by the Prime Minister. Mr Seaga has been under fire from the parka-mentary party, after the steady fall in the JLP's popular sup-port over the party's executive resignation at a weekend meet-ing of the party's executive the sluggish pace of economic The September car sales boom bad already been reported by Detroit car manufacturers and it had continued into early counts and sales incentives, including below market interest rates which the car manufacturers have been offering to get rid of

How long the fierce selling race can continue is in doubt. resignation at a weekend meet-ing of the party's executive committee during which some MPs suggested that support for the party had been eroded by the Government's economic programmes and by Mr Seaga's spending in general on durable goods may pick up because of tax reform legislation passed last month.

Mr Manley . . . demanding election.

style of leadership. At issue was the reason the JLP lost last July's local government elections to the social democrat People's National Party, led by Mr Michael Manley,

Mr Seaga announced his plans and left the meeting. Immediately, the party execu-tive "voted unanimously, and tive tive "voted unanimously, according to a statement from Mr Sezga's office, to reject his proposed resignation. The party split has apparently been healed, but the Prime Minister has remained unmoved through several Cabinet and party execu-tive meetings which have urged him to reconsider. The PNP, which has been at just under 30 per cent and

edvocating a general election the economy has stagnated, before it is constitutionally due Growth declined by 3.5 per cent in October 1988, said the cur- last year and 40 per cent of

a rarce, shid air reruval Par-terson, the PNP chairman. If Mr Seaga surprises the sceptics and ignores the plead-ings of the party faithful, his successor, who is likely to be Mr Hugh Shearer, the deputy Prime Minister, will be hard put manage the island's embattled economy.

Mr Sezga's election in. 1980 coincided with the start of a fall in demand for bauxite, the island's main export. Output last year was just under half that of 1980. Similar problems for sugar and bananas signific-antly reduced export earnings. Growth in tourism of 65 per cent since 1980 has not compan-

sated for the shortfall. It was against this back-ground that the Prime Minister started deregulating the economy, removing import controls to provide domestic industry with competition, while trying to boost exports of "non-traditional" products, such as garments and vegetables. There is still no indication that the Prime Minister's policies have

entire fleet with the new model."

But White Arrow don't only serve the needs of the G.U.S. group. They also make deliveries for many other companies.

In the words of John Abberley, their Managing Director, "White Arrow are specialists in parcel delivery to home and business, challenging for the number one position in parcel distribution.

And in aiming for that number one position they're driving Britain's number one van.

It's a van designed to surpass the almost legend-ary achievements of the old Ford Transit. (Whilst still retaining all the classic Transit traits.)

The new Transit boasts even more loadspace, even higher levels of cab comfort and significantly

improved fuel economy. Naturally, it's available in a wide range of derivatives, all of which can be specified with the world beating 2.5 direct injection diesel engine.

And although we're proud to number the police, ambulance, security and motoring rescue services amongst the many Transit users, we really couldn't hope for a better seal of approval than that of White Arrow and Mrs. Prowse.

THE NEW FORD TRANSIT

in October 1988, said the cur-rent crisis in the Government could be resolved only by an immediate vote. Mr Seaga's plan to step down as party leader next month but to continue as Prime Minister until August is farce," said Mr Percival Pat-terson, the PNP chairman. If Mr Seaga surprises the sceptics and ignores the plead-ings of the party faithful, his successor, who is likely to be we down as party mendation from the IMF that

mendation from the IMF that the Jamaican dollar be immediately devalued by 10 per cent. Mr Seaga has baulked at this propos

It is widely held in the It is widely held in the administration that the cumula-tive 73 per cent devaluation over the past three years has contributed to the fall in the Government's popularity. The Government is instead offering to devalue next year and again in 1988, a proposal which has so far not been accepted by the Fund.

Fund. Those Labour Party officials who suggest the Prime Minister will stay on, say he is seeking will stay on, say he is seeking a mandate from the party as a condition. This is designed to ensure that he will not be hammered by his critics if he is forced to implement more un-popular austerity as part of any agreement with the IMF. Already, Mr Seaga has started e house-cleaning, with a

BRAZII, has made a small but significant find of good quality oil in thevast Amazon region after three decades of searching had revealed only pockets of natural gas.

By two Dawney in Rio de Jas

basin

The discovery, by drilling rigs of the national oil company Petrogas, was announced an Wednesday by no less than the Brazilian president, Mr Jose Sarney. "God is belping Brazil." he said.

So far, the quantity of oil dis-covered is small delivering \$50 barrels a day from a 2,500 metre deep well situated half way be-tween Manaus and the Peruvian border, deep in the beart of the upper Amazon region.

Petrogas believes that the find will shortly produce 10,000 barrels a day, and are stepping up their explorations in the area which up to now have cost \$50m

Extraction costs in the Amazon are estimated at about Amizon are estimated a north \$3 a barrel—four times less than those in Brazil's deep water Campos Besin field of the coast of Rio de Janeiro state. The oil discovered is described

as light, high quality, and suit-able for diesel fuel. Exploration in the Amazon has continued sporadically since 1955, resuming more systematic-ally after 1978 when gas was found in the region. Recently a substantial deposit of 20bn square metres of gas was found, but its viability is hampered by a location 1,100 km from Manaus.

Manaus. Petrogas officials say the size of the new oil find is yet to be accurately assessed, but they be-lieve the total area of the field to be around 17 square km. En-gineers claimed that while no ona expected the total to be enormous, they anticipated ex-tracting "good quantities" when two new wells are drilled on the the site over the coming weeks. The company is also expected PERU'S civil servants yester-day began a 48-hour strike against the Government's wages policy, bringing work to a halt at eight ministries. The strike follows growing unrest on Peru's labour front, as the Government—which pushed up salaries in its first

The company is also expected to re-allocate a substantially larger proportion of its \$700m exploration budget for the year for further investigations in tha pushed up salaries in its first year in office-reconsiders its wages and prices policy. Across-the-board wage in-creases announced by President Alan Garcia at the end of Sep-tember have been delayed. The Government has promised to increase the minimum wage by 30 per cent to intis 900 (545) a month, give non-union per-sonnel a 25 per cent rise, in-crease civil servants' pay by 25 per cent, and teachers' by 30 per cent. region.

Debtor nations seek new approach

per cent, and reachers by 30 per cent. The Government's failure to ratify the increases; has been caused by delays in approving a mechanism to put up prices. most of which have been frozen for the past 18 months. Ex-portens, especially mining com-panies, also claim they are suffeting high losses, because of the Government's refusal to make an effective devaluation of the inti against the dollar. Miners are threatening a general strike on October 22 and 23, and the General Fede-ration of Workers is to call a general strike next month in protest against the Govern-

THE NEW FORD TRANSIT. **AS TRUSTED WITH GOLD BULLION, INTENSIVE CARE PATIENTS** AND MRS. PROWSE'S KETTLE.

The Ford Transit is the overwhelming choice of security companies and ambulance services.

That explains the gold bullion and intensive care patients, so where do Mrs. Prowse and her kettle fit in?

Well, Mrs. Prowse is a sprightly 68. She's lived for the past 50 odd years in a tiny farm cottage in deepest Comwall.

Her home is so far off the beaten track that she can't exactly pop out to the shops all that often. So Mrs. Prowse is a regular customer of Kay's mail order catalogue, part of Great Universal Stores plc.

The distribution arm of the G.U.S. group of companies is called White Arrow, Each year they deliver a phenomenal number of parcels to towns and villages throughout the U.K.

To achieve this end White Arrow run a fleet of 2.000 vans.

Every one of them is a Ford Transit.

In the course of a year White Arrow reckon that each of their Transits travels 25,000 miles. This gives an annual mileage figure for their fleet of around 50 million miles.

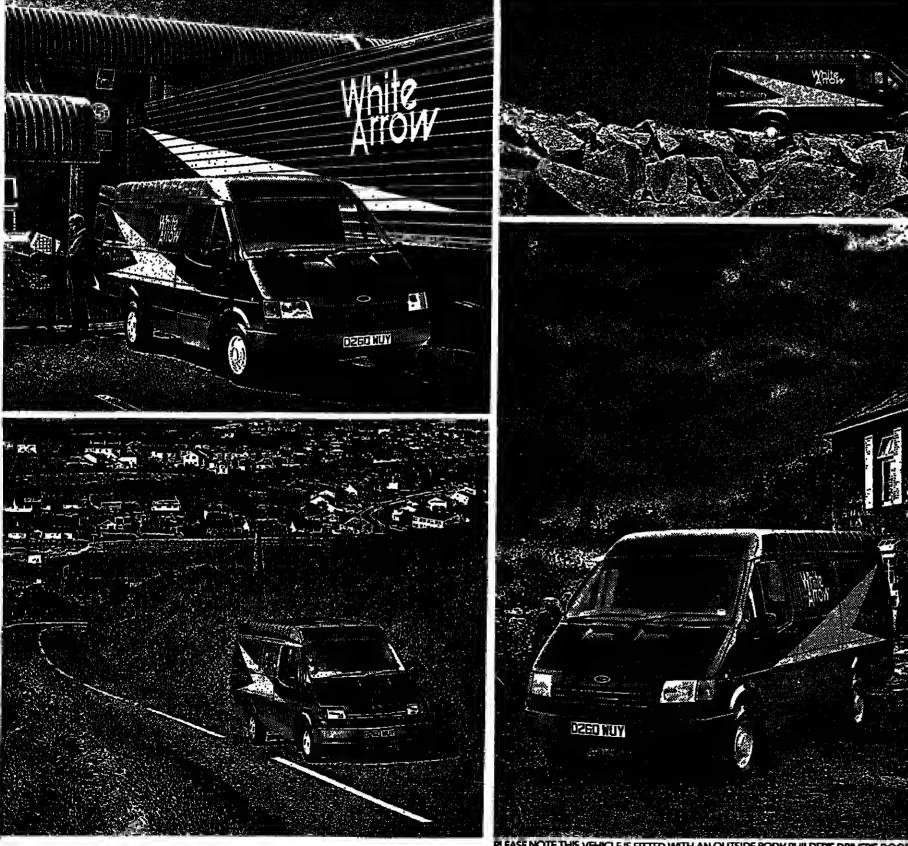

The man who's got the responsibility for those 50 million miles is White Arrow's Fleet Director.

As you would expect he's the constant focus of attention for all Transit's competitors, and he knows a great deal about the van market. "We test models of just about every other similar panel van, but the Transit has always proved

the better vehicle. All costs are recorded on computer Every single mile is logged and has been since 1968. The Transit comes top in everything"

A satisfied customer indeed. And he adds, "we're delighted with the new

Ford Transit and plan to progressively replace our

Announcing the end of the Motorway hold-up.

Every winter it's the same old story. Lines of trucks stopped dead by the cold.

Surprisingly, one way to get them moving again is to use a hairdryer.

5

It's true.

What happens is that in very cold weather, wax particles form in diesel fuel.

These gradually block the filter, and eventually cause a breakdown.

One way to remove the wax is to gently apply a little heat.

But if you haven't a hairdryer to hand? Well, now there is Mobil Diesel Plus.

A brand new diesel fuel which stops filters blocking right down to -15°C.

(If that seems a little over cautious, temperatures last winter often fell to -14°C.)

Diesel Plus also prevents deposits building to damaging levels.

Keeping your engine clean and preventing loss of performance.

Not convinced? OK. Freeze.

Mobil Diesel Plus. A cure for the common cold.

forward

By Lan Rodger in Tokyo

JAPAN has denied US charges that it has blocked an emerging

age from the current 25 per cent to 40 or 50 per cent, Japan was "very co-operative with that idea," but the US and the EEC were "far apart."
The US and the EEC wanted to remove the fixed interest rate of 10 per cent on these packages, claiming that this has enabled countries, such as Japan, with low domestic interest rates, to be more generous in the grant element of their packages. The Miti official said that the problem had to be looked et from the point of view of the recipient countries. If interest on tied ald was charged at the market rate, then these countries would tend to be more interested in interest rates than operations committee.

avs

in other factors in the package. Japan was not totally opposed to abolishing the fixed interest rate, but Miti argued that, if it were abolished, then the fixed component in the interest rates on export credits should also be removed. At the moment, this enabled countries with high interest rates to subsidise their export credit rate. Miti said the EEC remained opposed to applying market interest rates to export credits. Japanese officials would be "doing our best" to find a

market interest, and be credits. Japanese officials would be "doing our best" to find a compromise

ery and equipment. The persistent British deficit with Portugal—£259m in both 1985 and 1984, £200m in 1985,

1985 and 1984, £200m in 1985, contrasts with the growing sur-plus enjoyed by Spain. Trade relations between the two Iberian nations were tenuous for centuries but Spain has energetically seized opportuni-ties in a developing market from the late 1970s.

From January to August this year Spain ran a surplus of 225m with Portugal. Spanish factories and branchies of multi-national manufacturers in national manufacturers in Spain are taking advantage of the two countries' accession to the European Community to boost exports to the Portuguese market.

for the slowness of many British exporters to follow Spain's example and take advantage of the declining tariff and uon-tariff barriers after EEC entry. First, a misconception exists that the old alluance leads Por-tuguese importers to give senti-mental preference to British goods, with little need for the market. The latest major enterprise to begin moving heavy volume across the border is America's Scott Paper, exporting from its Spanish plant to a nation that uses less tollet paper per capita than any other country in Europe Europe. There are two main reasons

Tougher US action urged to curb steel imports

8,000 jobs.

BY NANCY DUNNE IN WASHINGTON

PRESIDENT Ronald Reagan's 22.7 per cent in June 1986. scheme to limit finished foreign steel import penetration of the US market to 18.5 per cent has come under fire in a report immed by the Hause superment. issued by the House government

Although the steel programme has reduced the surge of imports into the US, it has not done so sufficiently to eliminate the threat to the existence of the domestic industry, the report

interested in interest rates than in other factors in the package. Although most of the voluntary restraint agreements negotiated under the pro-gramme are being observed, the EEC is exceeding its finished

before you've read The Guide.

If you already know all about packet switching, forgive us for preaching to the converted.

If you don't, hear this.

Plessey packet switching can give your organisation - now faster, more efficient data communications, at lower cost than you've ever thought possible.

If you're a smaller company with branch offices then, for a small investment, Plessey can provide you with an economical network with access to Packet SwitchStream.

For the larger business - particularly with international affiliations - Plessey and packet switching will create a comprehensive, confidential network that can slash your data communications costs.

Plessey has written a useful introduction to packet switching which every business should read.

It speaks with authority, because it was Plessey, after all, who equipped BritishTelecom's own network. And it's Plessey who has the most comprehensive knowledge of packet switching in the country and the widest range of equipment. So, for chapter and verse on packet switching, just send the coupon, or contact the

NATIONAL & PROVINCIAL Building Society (N&P) is to offer a share buying and selling ser-vice in its branches from next year. Business will be channelled through Allied Provincial Securi-ties, the stockbroker formed earlier this year by a morger of eight regional firms, and N&P will

take a silce of the co As a first stage, there will be a pilot no-frills attached execution service operating in 12 branches in the north of England. After de-tailed evaluation and training of N&P staff, the service will be ezpanded to cover most of the so-cieties' 336 insuches around the

country. The branches will also start to stock research material. As a final stage, planned for 1968, there will be video screens in branches which will display share prices and through which ors will be able to execute transactions instantly. They will also be able to buy personal eq-

uity plans, with monthly pay-ments being transferred directly from their accounts with N&P. Allied Provincial will not, however, he putting its own staff into N&P branches, so investors wanting detailed advice will still have to go to one of Allied's 27 ofaround the country.

Visa system beats chaos at Heathrow

FINANCIAL TIMES REPORTER

THE NEW VISA system for immigrants from Asia had a virtually trouble-free start at Heathrow Airport, London, yesterday, in sharp contrast to the chaotic scenes of the previous day.

Within hours of the midnight. deadline, the first Jumbo jets from the Indian sub-continent touched down and most passengers seemed

to have their paperwork in order. After touring Terminal Three and speaking to immigration staff, Home Office Minister Mr David Waddington said: "The case for vi-

days." Unlike Tuesday, when 4,000 pical cross-section of businessi holiday-makers and short-stay visi-

allow people to beard without one. Travellers from Nigeria and Ghana will be included in the visa system at a later date.

On one of the earliest flights yes terday, from Dhaka, all passengers had the correct documents and had the correct documents and were allowed through without holdups.

Several hundred Bengalis w still detained for questioning as a result of Tuesday's influx. Up to 300 people, most of them young men from Bangladesh, spent the night sas is proved overwhelmingly by on the airport floor and a further surrendering their passports.

Mr Waddington said: "Literally would be immigrants descended on hundreds of people descended on the airport in a bid to beat the dead-England from Bangladesh. them in place in a crystal have been obtained by scientists at IBM, tha US computer giant, using a novel microscope they themselves invented. The power of the microscope is such that, as well as producing the images illustrated (right), it can pinpoint flaws of a scale which the semiconductor in-dustry must increasingly con-tend with as the microminh-

dustry must increasingly con-tend with as the micromini-tuarisation of electronics and opio-electronics marches to-wards goals of many millions of functions on a single crystal chip.

The story begins with the in-vention in 1981, in the Zurich Research Laboratory of IBM in Switzerland, of a new kind of microscope capable of distinguishing atoms at or near to a crystal surface-in three

dimensions. For the first 50 years of this century, evidence for individual atoms could only be inferred: from Rutherford's observations of flashes in zinc sulphide; from the vapour trails in Wilson's cloud chamber; from yon Laue'a use of X-ray diffraction, and so on.

Then in 1956 Muller used his field ion microscope to reveal how atoms are arranged at the now atoms are arranged at the polished point of wires of tungsten and other refractory metals. And Crewe in 1970 photographed individual heavy tures as delicate as a virus. Several universities, includ-ing Cambridge in the UK, Stanford and the University of atoms with the scanning trans- California in the US and—in mission electron microscope the case of living matter—the (STEM). voltage is established between this point and the specimen causing a current (electrons) to flow. By keeping the current constant, the scan of the needle can be recorded as a contour map of the surface of the specimen, detailed enough to distinguish individual atoms, as well as sites where atoms are missing or disordered.

As may be imagined, Binnig and Rohrer introduced some and kohrer introduced some ingenious engineering to keep their instrument steady enough to scan on this acale. As they see it, the central problem in interpreting an STM image is "how to disentangle the rich-ness of information it containness of information it contains into its topographical, chemical

and electronic features." They have shown how the STM can be used to perform chemical assay—spectroscopy— atom by atom. Most recently, Binnig and colleagues have shown it can be used to measure the incredibly slight inter-

"System 12 has fulfilled all specifications and features requested."

-DEUTSCHE BUNDESPOST

15

"System 12, a very advanced system, will give us the opportunity... to introduce the telecom services

of the future.

If you want to get an objective appraisal of ITT's System 12[™] digital phone exchanges, it's a good idea to turn to the experts.

For example, listen to the Belgian and West German PTT's, who've had firsthand experience with System 12.

In Belgium, it's three years since the first System 12 went into operation. And today, there are 35 local and toll exchanges in everyday service.

Belgium's response? "The RTT wants to meet the challenges ahead and is confident that System 12 can contribute -BELGIUM'S REGIE DES TELEGRAPHES ET DES TELEPHONES

substantially to achieve this goal."

The Deutsche Bundespost concurs: "Since 1985, all exchange versions of System 12—local, toll, international toll and Service 130—are being delivered with a continuous increase in volume. The exchanges are working fully satisfactorily."

To date, over 190 System 12 exchanges have been put into service in thirteen countries worldwide.

And every working day, we hand over still another exchange.

Which is an international success by anybody's standards.

TTT Europe, Avenue Louise 480, B-1050 Brussels, Belgium

"For 1S years we'd been a price the superstore league." and promoted its comprehensive wine selection, its extensive cheeseboard and its fresh meat

says man, "Because we were the first company to build super-stores of any size we were able to derive original economics of scale," (In the inflation-ridden ingly shopping once a week, at regular times, and often using " car. People were becoming

time. It plans to have 2,500 own label products by the end of next year, of what Asda folk are made to call "Asda brands" rather than own-label to remind themselves that this is addeduating and not move of Boots the chemists chain into Collett Dickenson Pearce and Texas Homecare into Boase Massimi Pollitt are into Boase Massimi Pollitt are into added-value produce and not e curiosity that Asda's new nd ading for the products has kept busy 22 design consultancies around the country. The sector

busy 22 design consultancies around the country. The second strand of the image shift has involved a re-image shift has involved a re-involves varied country. The Asda campaign will appear nearly every week on television. Eech month there will be a different poster and new shopper," says Smith. As expected, the creative approach is not in the mould of the competition. The mood is more tongue-in-cheek than the trival ads. In some of the com-mercials, northern comedy duo Victoria Wood and Julie Walters (both funny, gossipy approachable figures), chatter in sight. Instead the girls pro-gress through a mumber of exotic settings suggestive of the global choice nvailable at Asda. "When you've got the whole "When you've got the whole world to choose from at Asda, you'd be off your trolley to choose from anywhere else" is the tagline

new stores as part of its assault on the southern market. The third strand is advertis-ing. Asda's decision to plece the substantial £13.5m budget into the hands of Bartle Bogle Hegarty, one of London's lead-ing, but smaller creative agencies, raised eyebrows at the end of last year. Known for its eward-clinching work on Levis and Audi, the 90-strong agency had not handled a retail client before. "This means we came to it with no preconcep-tions," says eccount director Martin Smith. the tagline. Another commercial uses Bill Owen, of Last of the Summer Wine, and Leslie Ash of Cats Eyes, the UK television pro-grammes. Use of humorous per-sonalities is something of e tra-dition with the store which used Leonard Rossiter in the mid-1970s. The campaign is nation-wide though weighted towards its superstore sites. Too early to gauge response, the heavy moved on. "Tha customer now were less interested in the client before. "This means we sonalities is something of e tra-ehops on a whole gamut of fac-price-tag on e product and more came to it with no preconcep-interested in the contents label. tions," says eccount director quality and freshness. We were assault on its image some two fine on tho first few but slip-yoars ago. On the product side, creative agency underlines a pring on quality and warlety," a new merchandising policy wider trend in the retailing says Hardman. "Future com-which identified own-label as a whole range of consumor needs, an Asda own range for the first Audience measurement

AGB breaks into US networks

Antony Thorncroft reports on the risks and rewards facing the UK market researcher

... AND NOW, A MESSAGE FROM OUR SPONSOR .. AGB, the UK's largest market research company, is facing the WAKE UP! IT'S TIME TO PRESS biggest opportunity, and the biggest risk in its history. It has just been offered a contract by CBS, ona of the three top American national television YOUR AUDIENCE MEASUREMENT BUTTON!

networks, to measure its audience in the US. If it can clinch the deal, the entire audience measurement business in the US, estimated to be worth \$200m a year by 1990, is there for the taking. But the intervening period is fraught

with dangers. . In the UK, AGB first cama to prominence when it cap-tured the British TV audience measurement contract. It has held it now for over a decade and it is worth firm a year, mak-ing it the UEV biogent personnel.

audience measurement in the royal, for Nielsen is fighting US, has announced that It is back hard to retain its market. switching from diaries to The beneficiaries will be the meters. Tests suggest that the networks and advertising agen-overall audience does not cies in the US which will see change much with the new e fall in the cost of their TV method but chest cartain groups. and it is worth f2m a year, mak-ing it the UK's biggest research contract. Then in 1994 it took its experience to the US, and with the cooperation of a hand-ful of advertising agencies, and the networks, settled on Boston, producing TV eudience data. It brought to the US the "pcople meter." whereby the endience for TV programmes could be measured automatically by individuals signalling their presence as viewers by pressmethod but that certain groups, research. such as children, watch more. As part of its retaliation Niel-Cable viewing also received n sen is taking a new look et the

ing to one medium-sized stand erector, "only two exhibition centres mattered: Earls Court and Olympia in Lendon and exhibitors were only tee

particularly when the NEC started to cut prices to sitract more events.

"There are now many more exhibitions to choose from. Somebody gets a good idea for an exhibition and everybody else wants to get in on the act and stage a in an the act and may -similar event; you get over-kill. As a result, some com-panies are becoming more cost-conscious about image building and product promo

tion." A simple rule is that the cost of renting the space is likely to be about 30 per cent of an exhibitor's total costs; the rest, will depend on the

the largest research company in the world, with an annual turnover of over \$700m. An enormous sum of money

is riding on the outcome of the fight, for it is generally agreed that within three years only one company will be measuring national TV ratings in the US. In 1986 US companies will spend \$20bn on TV advertising, allocating it according to re-search findings. As well as the national networks there are thousands of local TV stations which Nielsen services in com-petition with the Time maga-zine subsidiary Arbitron, and which AGB would hope to attack once it has digested the hig three. Potentially it is an even greater market.

AGB has had its problems in recent months, notably with its Australian operations, Bringing off this tremendous coup would settle its future. It does not expect any profits from the US until 1990 and costs to date have been ebove forecast, hut sen is taking a new look et the UK. Its research director Jim Lyons is in London investigatits achievement in invading such a vast market, so successfully, is considerable. The US advertising industry likes a choice, and admires a new com-petitor. It will look favourably on AGB's efforts. But in Nielsen AGB faces an entrenched and very well-financed fighter. The result is by no means settled.

Organisers simply rent space, although some provide basic "shell" stands. Exhibitors will normally have to pay extra for the design and con-struction of stands, electrical and other contributes lavishness of the stand and the company's entertainment bill. Before allocating their pro-

motions budget, the ISBA advises, managers should analyse their reasons for wanting to remain on the ex-hibition circuit. It may be that a company wants to launch a new product, under-write its image or advertise its continued presence in a particular market. According particular market. According to a survey of exhibitors carried out by the ISBA, 54 per cent of exhibitors listed the "presence of competi-tors" as one of the principle

reasons for attendance. Since exhibitors are in effect buying attendance, whenever possible they should look for audited figures of previous events.

These are available through Exhibition Data Forms administered by the Audit. Bureau of Circulations,

and other services, entertain ment, transport, storage and staffing. In this context, it is essential that all people working on stand construction are members of the appropriate trade unions

If companies are participat-ing in a series of events, sug-gests the guide, modular stand building and display systems can be more economical than on-site building.

Finally, seek quotes for all contracted work, and from more than one company; and check that invoiced totals tally with estimates.

Guide for Exhibitors, nuailuble from ISBA, 44 Hertford Street, London WIY SAE; £7.50 for non-members.

A new-old Ring at the Met

The Met last did a full Ring There are compromises in tha in 1975, in a production based Met Walküre, too. They affect on Karajah's at Salzburg. A the costumes (by Rolf Langen-new Walküre has now opened fuss), the lighting (by Gil the season here in New York, Weebsler), and the staging-the start of a cycle to be con-ducted by James Levine, pro-duced by Otto Schenk, and de-a coronet and a jewelled sweatheimet but something between a coronet and a jewelled sweat-band. Brünnhilde wears gilded boots and a short, flimsy duced by Otto Schenk, and de-signed by Gunther Schneider-Siemssen the team whose Met Tannhäuser, in 1978, carried out skirt. The valkyries-galumphout WagDer's scenic directions with all the resources of the modern theatre. Rheingold and ing great horsey girls- expose a good deal of gartered thigh, a good deal of gartered thigh. The costumes don't match the sets. Nor does the lighting when followspots trace their hright circles across the natura-listic scenes. And in the stag-ing several of the modern Ring cliches—the new "traditions" —are perpetuated. Siegfried are due next season, and complete cycles in 1968-89. Acts 1 and 2 could be 19thcentury designs, in the vein of Max Brückner, Cosima's 1896 designer: they are like dio-ramas in the Bayreuth museum enlarged. This is the first Wal-kire I've seen since Covent Gar-des's Destune and a covent Gar-

The long, difficult pantomime A trois—58 slow hars—in Act 1 is solved by Hunding's going out to have a pee in the garden before retiring. Sleglinde gives den's postwar slaging (in Vol-koff's 1934 decor) where a great door files open to reveal a moon-lit forest. Act 3. the important, recurrent Valk/rie Rock, moves ou in style and iz infinenced by Appia's and Prectorius's famous before retiring. Steglinde gives a great scream when the eword is drawn from the tree. At the end of the act, the lovers don't just embrace but couple on the ground. Brünnhilde hugs Siegmund at the close of the Todesverklindigung. Sieg-mund dies in his father's arms. And the new Bayreuth craze for kneeding is carried to exaccounts of the scene; but Schneider-Siemssen's crag ind crevace, leaves and lichen, are crevace, leaves and lichen, are more naturalistically executed than theirs were. It is not bean-tiful scenary, like John Conk-lin's for the San Francisco Ring (based on Caspar David Wrled-rich and Schinkel), but it fol-lows the staga directions, more or less, and is far bolder in its historicism than any other nf the would-be "romantic" Riviss around. Most of those have com-promised, feared to step confi-dently backward. for kneeling is carried to ex-tremes: most of "Winterstilme" and "Du bist der Lenz," the siblings' dialogue in Act 2, Siegmund's share of the Todes-

between the old-style, monumental sets and what happens on them. It will take time—and courage—to forge an "old-style," dignified yet vivid enactment of the drama. This Walkire lacked specific character, and the cast could not invest it with the majesty and significance that Flagstad. Astrid Varnay, the Konetznis, and Hans Hotter brought to Covent Garden's similarly "neutral" staging. The singers are mainly from todey's standard Ring circuit, veterans of Friedrich, Chéreau, veterans of Friedrich, Chereau, Hall productions, and two casts are being shuffled. Jeannine Atmeyer's Sleginde lacked spontaneity; when 1 heard her as Brünnhilde she was unwell, and retired after Act 2. Hilde-

and retired after Act 2. Hilde-gard Behrans took over. Johanna Meler's Sieglinde was mateady. Peter Hofmann's Siegmund was keenly played and verbally incisive, and he was in somewhat hetter vocal form than usual; Timothy Jenkins'a first Siegmund was wocally promising but un-polished, and it was rash of him-for he is hulky-to essay Hofmann's hoyish moves. Aage Haugland was a magnificent, Haugland wae a magnificent, formidable Hunding.

Behrens, for all her intelligence and vitality, doesn't carry the guns for Brünnhilde. She gets through the part hut doesn't command it vocally, and stegmund's shire of the folds- gets infough the part hut verkindigung, Sieglinde's "O doesn't command it vocally, and hebrstes Wunder," Wotan's her modern, energetic epproach Farewell, and much else are aometimes suggests a grown sung kneeling. In short, there is a disparity schoolgirl. When the Met

records its *Ring* (for Deutsche Grammophou). James Morris is to be the Wotan. Onstage, Simon Estes was strangely blank; tha voice pours out tire-lessly, shining, and powerful, but words and physics seem th hut words end phrases seem to mean little. Donald McIntyre, mean little. Donaid McIntyre, his veteran alternate, has never been an imposing Wotan, hut he does understand the role. Brigitte Fassbænder's Fricka sounded more like a common soold than an offended goddess. For the valkyries, a new young team, all hut one Met debutantes (led hy Eleanor Bergquist'a Gerhilde and Marita Napier's Helmwige) had been engaged They were s lively hut not well-tunad posse. There were no borses; the valkyries themselves trotted and cantered. The orchestral playing was

17

The orchestral playing was good: warm, full strings, eloquent woodwinds, hrass perhaps a shade hright, excel-lent balance. Levine's reading was broad yet ardent, some-times perhaps too steady in flow not cwitibly metaneting to times perhaps too steady in flow, not swiftly responsive to the eddies of the drama. (Fve been listening to Furtwängler's Scala recording.) This Wälkure promises e Ring in which all attention will be thrown onto tha artists: no adventitious aids from e producer's fascinating new "conception," no "state-ment" other than those made, in Wasner's words by the

in Wagner'e words, by the singers. It's e hrave under-taking, and one wishes it well.

Business and apartheid

the role and responsibility of foreign businesses with invest-ments in that country. Sharebolders and customers in the US and Europe bave arged disinvestment, in the hope of exerting increased pressure for the abandonment of apartheid, and several western companies bave either reduced their exposure or withdrawn entirely. The long and concerned letter on this subject from the group managing director of Royal Dutch/Shell to all Shell chief executives is one sign of tha saliency of this dilemma in husiness boardrooms; the decision by General Motors to review the future of its South African sub-sidiary is another.

It is not at all clear, however, It is not at all clear, however, that the parallelism between the two debates, though close, is close enough to lead to the same conclusions. In both cases tha arguments are rendered ex-tremely speculative by the disct fitculty of forecasting the effect of sanctions; but whereas the balance favours governmental sanctions, if they have any chance-however small-of ec-celerating reform, the case for company disinvestment on poli-tical and/or moral grounds seems much more dubious.

The problem for business leaders in South Africa, and for multinstionals with sub-sidiaries in South Africa, is to strike a sustainable combinastrike a sustainable combina-tion of purely business calcula-tions, with the broader political and moral responsibilities which should accompany the wielding of economic power and influ-ence. Given the state of crisis in South Africa, even the business calculations may be bard enough to weigb; combin-ing them with political respon-sibilities may be even harder. But the quandry cannot be avoided, and it may be most acute for companies which take most seriously their social responsibilities.

Business calculations

General Motors has given two reasons for reviewing the future of its South African subreasons for reviewing the adequate to handle the crisis. Shell supports the conventional litary: first, the lack of pro-gress towards ending apartheld; second, the desperate state of the vehicle market there. It is not clear which reason is more important; but the implication is thet GM may not foresee a

A bill that

development officer for Birming-ham Settlement, which offers

advice on debt problems, says: "Four years ago it was unusual for people t come in with debts of £5,000. Now it is the norm.

We even get cases of up to £12,000."

"Such people are pushing credit like there's no to-morrow," says Ms Andrews. "Anybody selling donble glaz-ing nowadays is not only selling his product but also the financ-ing. It does not bother him if the botter part are and here the borrower can't pay and loses "his house."

There certainly are casualties + and their number is on the rise. Even more have not yet fallen by the wayside but have increased their indebtedness to such an extent that they are vulnerable to a deterioration of their economic circumstances.

18

needs support

This rimancial Services ball was never likely to prove a popular piece of legislation with the City of London. As it goes through the report stage in the House of Lords this week, how-ever, it seems to be attracting a degree of wear hostility from a degree of weary bostility from market practitioners that borders on exasperation.

This impatience finds an echo in tha Lords, where the pros-pect of soldiering through 350 government amendments does not inspira universal enthusiasm. According to its detractors, the bill has been badly planned and badly drafted; its rules are too detailed, to the point where it could inhibit business. Why not, they ask, take a pause for thought and clarification?

The argument is seductive because the criticisms are not wholly unfounded. One of tha penalties of placing self-regulation within a statutory framework is thet some flexibilitty is lost. Parts of the bill are indeed confusing. And there is no question that the City faces a sizeable bill for the new regulatory machinery, although estimates of a £20m annual cost, including around £6m for the Securities and Investments Board alone, fail well short of the budget of the Securities and Exchange Commission in the US.

Cumbersome procedure

That said, there is a powerful element of special pleading in the cries of woe from both Westminster and the City. Most of the amendments to the bill ara technical: substantive issues are involved only in some 35 of them. Given that the legislation sets out to provide a comprehensive overhaul of the British system of investor protection this is hardly beyond the bounds of reasonableness. Nor could any bill of this kind escape allegations of complexity, precisely because the subject matter is genuinely difficult.

These problems bave, how-ever, been made worse by the cumbersome nature of commit-tee procedure in the Lords. In the Commons, committees front the more competitive usually consist of small, and in world that follows Big Bang. many cases reletively expert, groups of MPs who are able to tackle the datails of a bill with considerable application. In for investors if the bill, imper-contrast the Lords have in deal fections and all, were lost. with complex clauses on the There is no case for delay.

THE Financial Services Bill was floor of the house and involve greater numbers, some very inexpert, in the discussion. But this is an argument for procedural reform, not for delaying the bill. And where City interests are coocerned, it has to be said that those who want delay are seeking to bave their cake and eat it. The chief

tion prize.

More concessions

The Government has, on the whole, been remarkably comwhole, oeen remarkably com-pliant in its handling of the City's representations, notably in relation to the grant of legal immunity for those who sit on tha boards of Self Regulatory Organisations. It may well have more concessions to make, not least to the professions, which have not been granted the same immunity and whose case will thus be hard for the Government to refute. In short, the City has had a

feir crack of the whip; and it would be unfortunate if the December.

whole object of the exercise, which is investor protection, were now to be lost sight of. If the bill wins the Royal Assent in November, its implementa-tion will still be remarkably slow. Powers have to be delegated to the Securities and Investments Board; tha Office of Fair Trading bas to be satisfied that the rules are not anti-competitive; the SIB itself has to satisfy itself about the rule books of tha Self Regulatory Organisations and Recognised Investment Exchanges; and so That means that the bill is

ECONOMIC VIEWPOINT Inje Chance to avoid national suicide

THE basic case for Profit Related Pay (PRP) was made by Michael Posner, until recently economic director of NEDO, when he told the Public Policy Centre that the country was committing collective sui-cide on wages. He said the Chancellor was "to be applanded for bringing forward proposals which in 10. to 15 years might have a significant and beneficial effect" in bringing greater reality to wage bar-gaining. There was so little long-term hope, that PRP was more than worth the risk.

The clue to the confused debate over profit-sharing is to distinguish very clearly be-tween the reasons why com-panies have come to adopt profisharing as a business strategy and the very different economic reasons for supposing that pro-fit-related pay may promote em-ploymant, which have been pro-mulgated by Prof Martin Weitz-

To a businessman a profitrelated bonus—whether in cash or in shares—is an addition to the normal wage. It is a trans-fer from the holders of the equity in the company to the

Take an employer with a labour force where average earnings are---to take unrealistic A profit-sharing bonus might raise this to £105. The employer might hope to finance the increase from improved productivity. But there is nothing at first eight to create more jobsexcept in the very loose and general sense that an economy se and with a thriving corporate sector might be expected to do better on all aspects of economic per-formance.

The employment-promoting aspects highlighted by Prof Weitzman belong to an entirely different set of ideas. Let us go back to the employee earning £100 per week. Under a Weitzman-type scheme this would be distinged

week. Under a Weitzman-type scheme, this would be divided in two. There would be basic pay of, say, £80. The rest would be made up by s profit-related element. This might be more or less than £20—and total pay more or less than £100—depend-ing on the movement of profits. ing on the movement of profits.

distinction between The traditional profit-sharing and Weitzman-type PRP is blurred by the following considerations: 1.—The profit related formula might be generous enough to provide in an average year a bonus of £25 at the expense of the equity holder rather than £20. Indeed this give-away element might be essential as a sweetener. -Inquiries after the 1986 UK Budget revealed that em-ployers did not think their

ployers did not think their workforces were prepared to put 20 per cent of their pay at risk overnight, even with s tax incentive. The most that could be hoped is that this proportion might be reached gradually as em-ployees accepted profit-related increments in partial place of annual pay increases.

inevitably more likely to occur... One way out of this might be a move to a system in which a significant propor-

pressure to lay men off," and they would be keener to take them on in periods of expansion. Let us elaborate in terms of the example. If a worker is paid a straight wage of £100 per annum he will be taken on only if he edds more than £100 to value solded. If instead, he is paid an £80 wage, and £20 as a share of overall profits, he will be employed to how as his map. be employed so long as his mar-

informal related to one third of pay in Jspanese industry and have provided an important shock-absorber in partnerships, and where remuneration is linked directly to the year's results, fluctua-tions in performance show

annual pay increases. Why, then, should the more thorough-going ideas of Profit Related Pay promote employ-ment? The basic case was put in the 1986 Budget Speech. "If the only element of flexibility is the number of people em-ployed, then redundancies are

in which a significant propor-tion of an employee's remunera-tion depends directly on the company's profitability per person employed. This would not only give the workforce a direct personal stake and interest in their company's success... it would also mean that when business is alack, companies would be under less pressure to lay men off." and

to price people into work.

ginal contribution exceeds £30. A very hostile study hy labour economists Blanchflower and Oswald is being used to knock down PRP. Yet their full paper admits: "We have not tested the hypothesis that cash profit sharing leads to higher or more stable employment"-and a test is more difficult than they

kinds of two-tier systems. The 25 per cent of gross pay. Thus Green Paper allows for a quali-time "dead weight" of existing contrary to popular belief can moving to qualify would attract be as long as the employer cares to specify. Fourth, Professor Weitzman Novel to han a likely to be a

Fourth, Professor Weitzman himself believes that if a "critical mass" of firms went over to FRP there would be which is more likely to be a substitute for normal pay. There are, however, siren voices inside Whitehall who no downward pressure on real pay, because full employment would like the tax concession ould prevail; and the compet dropped rather than extended on either of the following STO

would prevail; and the competi-tion among employers would boost basic pay and suck in new workers in vacuum-cleaner fashion. But I would not like to raly on this defence, especially when we are thinking of incremental reform rather than revolutionary transformation. The discussion that the Budget speech and Green Paper promoted has already done enough to stimulate profitsharing.

 Direct schemes to help the long-term unemployed will do more to reduce the un-employed number per pound spent than FRP.
 The first objection shows a misunderstanding or disbelied If yon add together the "hoy scout" effects and promotion of two-tier pay, the prima facie case for trying PRP becomes overwhelming.

misunderstanding or disbelief in the wider spillover benefits. Even if the discussion so far does encourage profit-sharing, it will be of the traditional There is, however, one peculiar aspect of the way in which the Chancelior and his officials have approached PRP.

It will be of the traditional sweetener kind. Personally, I would favour both direct job schemes and PRP. But my own political hunch is that it would be very easy to kill off PRP without pro-viding more direct job creation, in return This is the importance attached to employer reaction. Can employers, who are and should be mainly concerned with running their own husi-nesses, be expected instantly to in return.

embrace the wider economics of PRP as soon as the British In the case of in the case of incremental employment sub-sidies, they are by their nature temporary. If long continued they would lead to shuse and widespread distortion. The Treasury merely hints at them? There is, also, a much cruder point. If take-up is high then the wider benefits will be widespread distortion. The jobs produced by PRP are on the other hand part of the obtained. But if take-up is low, the cost to the Exchequer will be low. So for once the Channormal economy.

normal economy. The revenue cost of PRP would take time to build up. If, by 1990, 2m workers draw 5 per cent of their pay in PRP, im 10 per cent, and half-a-million 20 per cent, the take-off will have been quick. But total gross cost would be less than £300m per annum. By comparison, a 1 per cent cut in the basic rate would cost £1.8hn, nearly all of it by '1987-88. be low. So for once the Chan-cellor wins either way. The more serious—but easily remadled—defect of the Green Paper, is that in softening the terms, the Chancellor has re-duced the tax incentives to dangerously low levels. Exemption from tax would, in the Green Paper, apply to a quarter of PRP received by each employee, up to a limit of 5 per cent of total remuneration 1987-98

or £1,000 per annum, which-ever is the lower. In s scheme Indeed, it is probable, that provided the 1987 Budget is seen as sound in other respects, the financial markets would provide a chieft increase in starting with s 5 per cent PRP, the relief would be just over 70p a week to a worker on average pay. The cheapest and most effecaccept a slight increase in Government borrowing due to PRP as a long overdue contive way of increasing the incentive is to have e sliding reibution to structural neform. scale of reliefs starting with the there is not really a trade off with anything, except con-ventionality, parrow-minded-

The UN's lack of authority

By Jurek Martin

CONSIDER THE present state the two superpowers. The of two institutions and their sits vac. The International American right's long disaffec-tion with the UN always sits vac. The International Monetary Fund needs a new managing director. There is no lack of good, qualified candi-dates, and two with impeccable oredentials, Mr Onno Ruding, the Dutch Finance Minister, and Mr Michel Camdessus, Governor of the Bank of France. presaged a rough ride in an administration as conservative as Ronald Reagan's (indeed it might have been far worse than Finance ministers from around the world could not decide in Washington earlier this month who should get the nod and neither could the European Communitys in Strashours the

Communitys in Strasbourg this week. Lobbying is intense and week. Lobbying is intense and the bookies are laying off. Until last week, the IMF'a narent, the United Nations, also needed a new boss. Quietly last Friday, its powers-that-be-the Security Council, approved a second five-year term for Mr Javier Perez de Cuellar from Peru. Only months before, the incumbent secretary general had undergone heart bypass surgery and, not so long before his operation, was still main-taining that he would only serve one term. Yet there has been virtually no debate about

been virtually no debate about the succession. little visible lobbying and even less pohlic

interest. This is a curious, and sad, state of affairs. The IMF's history is that the man who bistory is that the man who runs it has real, if not unlimited, authority. It is a tradition that a European hold the reins and Europe has recerally produced candidates of real quality for the office. But the strength of the DMF also lies in the calibre of its staff and, critically, in the involvement of its principal member nations.

Monvement of its practical member nations. At present, no international organisation has greater need of e dynamic head, a better quality staff and greater inter-

national commitment than does the United Netions. It is being the United Netions. It is being battered fluancially, hammered ideologically and demoralised generally. Its good works are being discounted and its waste and excesses, both at head-quarters and in its subsidiary agencies like UNESCO, given heavy memoranea To a degree, the UN is the victim of circumstances beyond

Sadruddin Aga Khan. second coming of McNamara would not its direct control. It caunot com-pel members to pay their does on time, especially when the cipal delinquents have been

it has been). But the institution itself does have certain housekee responsibilities and, in exercise of these, it has been increasingly deficient. Ten years of intense internal politicisation under Kurt Waldheim have been succeeded by a regime have been succeeded by a regime of complaisance under Mr Perez de Coellar, under which the bureaucracy has been allowed to run riot at the expense of policy and innovation. There have been simply far too many scandals for comfort and they

have not been offset by the diplomatic and creative initiatives still expected of the UN. Its moral anthority seems to have gone missing.

Such modest push as there has been for reform has come from the outside, not from the UN itself, and from unlikely from those with the clout to bring about change.

Mr Perez de Cuellar was returned, not because he had done his job well by any reasonable yardstick, but hecause he had made his peace with Washington. Moreover, it did not suit any of the other major UN con-tributors, including the Soviet Union, to cross swords with the US over this issue. This may he the line of least resistance, or realpolitik, but it is also cynical and potentially expensive, be-cause unless and until someone subscriptions are not going to reap e respectable return-

Mr Perez de Cuellar is not personally to hlame for the UN's current parlous plight. But the record suggests that he is not the man to pull it out of the mire, unless he has the backing of the world's majer powers, which is unlikely to be forthcoming. Better candidates exist — the loser in the DMF race, for a start, or ex-president Obesanio of Nigeria or Prince Robert

survey my firm commissioned on the ettitudes of senior executives in international invest-ment husinesses to the regulatory proposals under the Finan-cial Services Bill. This survey certainly edded support to the general disquiet at the number of amendments being introdriced and the pressure that this was patting on the upper house. In the words of one respondent: "the fundamental flaw is that it's designed for the Aunt Agathas, and not the pro-fessional investors."

investor 🚥

From Mr K. Woodley

I cannot say that, as a mem-ber of the accountancy profes-sion, the Bill is entirely satis-factory. As a member of a firm closely involved with the City for many years, I am, however, convinced that the legislation, however complex seeming, is absolutely necessary, and that it is essential that the Bill is not lost. It is too easy to forget not lost. It is too easy to forget that many areas of investor protection are in urgent need of reform and that the existing legislation is out of date and has not kept up with the developments.

NO UT

m

The Stock Exchange has taken the lead and introduced a sweeping series of rule changes to cope with the new situation and has moved with the times in proposing the merger with the international securities community at one end of the scale and with the formation of the third tier within the Exchange at the other end. There are, however, other end. There are, however, many areas of operation outmany areas of operation out-side the Stock Exchange which urgently require s new legisla-tive framework and it will not be good enough to leave up-regulated all the other areas which Professor Gower identi-fied in his report as long ago as January 1984. At this late stage there is no alternative to the type of regr

At this late stage there is no alternative to the type of regu-latory structure the Bill aims to set up, which could provide the necessary response and adaptability to meet constantly shanging situations. And let us not forget the Aunt Agathas. Keith S. Woodley. Deloitte Haskins and Sells, 128, Queen Victoria St, EC4. upua

The Phoenix

initiative

From the Chairman, Redland Sir,—On October 13, you published a report by your Regional Affairs Editor suggest-ing that the Phoenix initiative ing that the rhother initiative had been severely damaged by the withdrawal of Sir Nigel Broackes, whom I approached earlier this year to take on the chairmanship of its steering committee. After discussion committee, After discussion with Ministers, Sir Nigel advised Mr Nicholas Ridley, the Secre-

The Phoenix initiative, mean-while, has continued to ettract growing interest and support and to make progress towards bringing viable urban develop-ment schemes to fruition. The many people and organisations who are working together under the Phoenix initiative recognise that a serious endeavour of this kind does not depend on any one individual. In any case, it appears to me to be mischierous of your correspondent to use comments made by Sir Nigel at the time of his withdrawal four months ago to kend spice to his entirely erroneous sug-gestion that the Phoenix initia-tive is collapsing. tive is collapsing.

Whether our efforts will whether our envire with ultimately prove successful depends largely upon the Government exercising its political will to tackle urban regeneration seriously and with

an appropriate measure public funding. (Sir) Colin Corness, (Chairman, Phoenix Initiative). Redland House, Reigate, Surrey.

the way

Sir,—It is interesting to note (Oct 10) that Malcolm Rifkind has made a pledge on early rates reform; but, in view of what the Government proposes, "reform" is hardly the right word. Here a comparison is in order

seneration: Pittsburgh points to some possible answers." It would seem that unemploy-ment in Pittsburgh is down to 8.6 per cent, and still dropping, whereas in our conurbations it is "cast in stone" between 14 and 22 per cent. Mr Garnett attributes this to a greater will-ingness to invest in Pitts-burgh's future, but falls to enquire why Pittsburgh has been chosen rather than the

enquire why Pittsburgh has been chosen rather than the adjoining Monongahela Valley, where the steel mills are "rust-ing hulks," The answer to this is to be found in "Congressional Record " for February 20 1985, where Congressman William J. Coyne, member of Pittsburgh City Council from 1973 to 1980, describes how a new local property tax, mainly on land values, discourages the practice of holding land unused, and thereby makes it available on Mr Nicholas Ridley, the Secre-tary of State, on July 10 that easier terms. Anyone who wanted to buy Ab-

bey Life shares has had such ample

and third quarters which compare with a dull patch in 1985. The fourth quarter of last year was rather better, and for the year the total of such commissions might reach £50m against £46.4m last time. The larger sales force armed with a product range showing fewer gaps ought to help and next year Abbey might be a net beneficiary of the new Financial Services Act. If the final dividend follows the interim the yield will be close to 6 per cent, at the top end of the sector. That should at least stop the shares slipping any further.

Aitken Hume

While Aitken Hume International was fending off the bid from TranessxCIAL wood in the summer, its US fund management subsidiary was fre-quently referred to as the jewel in its crown. Judging from the compa-ny's interim results, almost everything else in the diadem is paste. Were is not for the £3m contribution from National Securities and Research, there would have been e pre-tax loss. Aitken Hume has found another business gone sour to hmp into the now familiar cate-gory of discontinued activities: leasing. The loss-making UK fund management looks like a case for SOLV T M EN

similar treatment, but is being given more string by the new management

opportunity to do so thet it is rather Although the 64 per cent profits growth from NSR is gratifying, that growth is pretty much in line with the competition. Aitken Hume should make at least £4.5m pre-tax this year but that puts the share price, unchanged at 143p, at a heavy premium to such sectoral blue ching as Henderson Administration and Templeton.

> This anomaly can hardly be explained away by denoting Aitken Hume a management-led recovery stock. And the now well-publicised tendency of NSR's trustees to frus-

Put simply, Mr Lawson's philoso-phy is that the Government must

control inflation through its macro-

economic policies, but the only way

to improve real output - and create

jobs - is through improving the sup-ply-side performance of the econo-

Since the initial brief honeymoon with the markets, however, he has

found himself plagued by the regu-lar starling crises that have dogged every British Chancellor since the 1960s.

In part they can be blamed on events outside his control - the col-

lapse in oil prices or a year-long miners strike. But there have also been fundamental doubts about Mr

Lawson's commitment to the finan-

cial straitjacket of the MTFS. With inflation down to (by British standards at least) relatively low levels, Mr Lawson often gives the

impression that he is more interest-ed in the supply side problems of

Britain's economy than in further

progress on inflation. In fact, the Chancellor has never

After meeting Mr Gorbachev, President Alfonsin said the Soviet leader had made it clear to him that the arms proposals put forward by the Soviet Union in Reykjavik were Mrs Thatcher is also expected to the Soviet Union in Rey or go to Washington for talks with an inseparable package.

with tactics.

tiator, repeated in Bonn what he include a large representation of overseas financial institutions. Furhad said in London the night before ther details were revealed yesterday of the proposed merger, to be approved in meetings on October 29 for Isro members and November 11 for the stock exchange.

Barring any grassroots revolt, the ecognised investment exchange recognised investment exchange (RIE) of the newly merged organi-sation will be headed by Sir Nicho-las Goodison, and its self-regulatory organisation (SRO), called the Sec urities Association, will be headed by Mr Large. Mr Ian Steers, the chairman and the leading founder of Isro, said yesterday that he was not interested in heading the new

things," he said.

been the monetary purist that some imagined. And now he dismisses the idea that he has given up on inflation as a confusion of strategy

The analogy he chooses is that of ship's captain who charts in advance his course for a long voyage. He has to adapt it from time to time to cope with changes in the weather, tides and currents, but he still

It is difficult, however, to escape the feeling that Mr Lawson finds his real intellectual stimulation in the idea of a supply-side revolution in Britain, rather than in the numbers of the MTFS. Curbing union power, tax reform and reductions, deregulation, privatisation and wider share ownership are the things he sounds passionate about. ber 24.

Mr Large and Mr Stanislas Yas-sukovich, chairman of Merrill Lynch Europe, are the only two Isro nominees for both councils. The other Isro nominees include three UK merchant bankers; 10 represen-tions of North American hanks tatives of North American banks and securities houses; four representatives of Japanese banks and securities houses; three European bank representatives and one Ans-tralian. The members of the Coun-

Isro itself is to change its name and constitution and beome the Securities Association while the stock exchange will become the RIE. The corporate continuity is being preserved for tax reasons.

The new councils will also draw up rule-books for the RIE and the SRO which have to be approved by the Securities and Investments Board (SIB), the City of London regulatory overseer, early next year. At present, three joint working parties of stock exchange and Isro members are working on the conduct of business rules, the capi-tal adequacy requirements and the rules for client money segregation.

commitment required to make a substantial contribution in this fast growing company.

Experience of managing the finance function in a manufacturing environment, ideally computers or electronics, is an essential requirement following exposure at a senior level in the profession.

An attractive remuneration package is available which includes salary and profit related bonus producing earnings of around £35,000. Other benefits include company car, share options, pension scheme and medical cover plus relocation expenses if required Please reply in confidence to Anne

Routledge, quoting reference D3018/L, Executive Selection Division.

With significant worldwide interests including merchant and investment banking, stocktoroking, foreign exchange and money market operations, this group has a network of offices offering a 24-hour service to clients.

Acquisitions continue to increase their fields of activity and the last 12 months has seen them become an established and credible force in the UK market.

To play an important and expanding role in these operations they now require an internal audit manager to be responsible for all financial and operational audit. Whilst some travel is anticipated, this is not likely to be significant. Opportunities for progression outside the internal audit function are excellent as is the potential to work in other locations of this group.

To fulfil this role you will need to be a qualified accountant with at least 4 years' experience of either internal or external audit covering banking operations with experience of money market, foreign exchange, futures and options operations. Compensation will not be a limiting.

Brussels/Milan base

United Technologies is one of the largest manufacturing groups in the world, with sales in excess of U.S.\$16 billion. Their companies, which include Pratt & Whitney aero-engines, Sikorsky helicopters, Otis Elevator and Carrier airconditioning, are all market leaders in their respective fields. European operations have expanded rapidly in recent years with sales now in excess of U.S.\$2 billion, and 30% of audits relating to new acquisitions.

The European audit team provides a real opportunity to gain substantial and varied commercial experience in .the review of financial and operational systems, in a highly computerized environment. In addition, the company's firm policy of internal advancement has led to a very high success rate in promotion to key management positions within 2-3 years. As a result of further planned promotions, they now seek other high-calibre individuals.

£29-41,000 U.K. equivalent salarv

Successful candidates must have a clear potential for advancement.

Requirements include superior communications and analytical skills, motivation to excel and a minimum of three years' financial and/or industrial experience. Working knowledge of a second European language is required and a maximum age of 36 is envisaged. Significant European travel is necessary, with return to home base at weekends. While this is normally Brussels, their Italian speaking auditors are based in Milan. Interested applicants should contact Stephen Raby on Brussels 648.13.84 at Michael Page International, Avenue Louise 350, Box 3, 1050 Brussels. Alternatively, write to him c/o Michael Page International, 39-41 Parker Street, London WC2B 5LH. Please enclose a comprehensive curriculum vitae with your application, quoting ref. B 315/FT.

Accountancy Appointments

- 53

Accountancy Appointments

Were you to join us you would join a UK consultancy team of 375 professionals, working within a worldwide group of over 3,000 consultants,

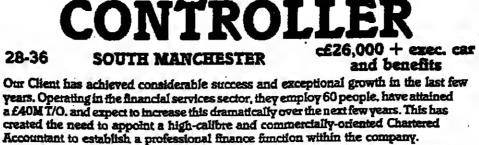

This size enables us to provide the breadth of service to clients that is essential in the international markets of today. It also gives us access to an enormous skill, experience and knowledge bank, and it enables us to fund research and the development of products, services and people.

In Peat, Marwick, however, size does not submerge the skills or ideas of individuals. Within the firm you could join one of our financial management

groups of 15 or 20 professionals, or a group of sometimes only four or five who are dedicated to developing and delivering products and services to a particular industry or market sector. This is consultancy within Peat,

Marwick. If you are a graduate accountant with excellent post qualification experience in well managed organisations, and would like to discuss opportunities in consultancy with us, we would be very pleased to meet you.

To enable us to prepare for the discussion, please send a brief c.v. with remuneration history and quoting reference FT/OCT6, to Mike Coney.

The brief will be to overhaul present systems to assure more effective management information, introduce new and comprehensive computer facilities, establish top level liaison with City and local financial institutions and provide a sophisticated technical input to business development plans.

The environment is busy, enthusiastic and service-minded, with a strong sense of commitment. The new recruit will share this philosophy and will be expected to build a financial support team which is equally dedicated. Growth will bring change and challenge; meeting that challenge will attract significant future rewards, offering the possibility of director status and participation.

Please contect Dudicy Harrop or Lawrence Barnett in our Manchester office, quoting reference number M351.

Accountancy Appointments

ADDISON CONSULTANCY GROUP PLC

The recent merger of Chetwynd Streets PLC with Addison Page PLC and the acquisition of the Taylor Nelson Group Limited has created this newly named Group which has gained the permission of its shareholders to undertake a further acquisition of Aidcom International PLC.

This has created a substantial communications and management consultancy group offering a wide range of complementary and balanced specialist services, both in the UK and internationally including Personnel Services, Design, Financial and Corporate Communications, Consumer Communications and Research. As a result of this planned expansion, two new positions have been created within the Group's finance function in Central London.

GROUP MANAGEMENT ACCOUNTANT to £20,000 + car

Reporting to the Group Corporate Accountant, this position would give the individual responsibility for the Group's management reporting functions, preparation of group budgets and forecasts and involvement in assisting senior management in financial analysis for corporate and strategic business plans. In addition, the selected candidate will be expected to assist in the development of the Group's treasury functions and to undertake a number of adhoc projects.

Candidates, preferably aged between 26-30, should possess a recognised accounting qualification (ACCA, ACMA or ACA) and be able to demonstrate an ability and willingness to work within a dynamic and commercial environment.

Interested applicants should contact Charles Austinon 01-831 2000 or write, enclosing a

ASSISTANT **GROUP FINANCIAL ACCOUNTANT** to £20,000 + car

This key position relates to the Head Office and subsidiary financial accounting functions. Reporting to the Group Financial Accountant, the role offers considerable man management experience and the opportunity to become involved in other areas of the Group's activities.

The selected candidate will have responsibility for the day-to-day accounting functions, preparation of annual and half-year consolidations, divisional tax compliance work as well as specific projects and invest-igation assignments delegated by the Group Financial Accountant. Candidates should be Chartered Accountants, aged 25-28, with a sound professional background, currently working in the profession or in an industrial or commercial organisation.

lobbies for Alfa takeover

By John Wyles in Rome

FORD was lobbying last night to turn the tide of political support in favour of its projected take-over of Alfa Romeo at a meeting between its president, Mr Donald Potersen, and Mr Bettino Craxi, Italian Prime Minister.

The initiative is an atte pre-emptive strike by Ford in advance of the counter-offer for Alfa which is expected to be tabled by Fiat early next week.

Mr Petersen was expected last Mr Petersen was expected lest night to explain the Ford propos-als - whose details remain a sec-ret - and to put particular stress on guarantees of employment and operating autonomy which they offer Alfa Romeo.

Ford's undertakings are be-lieved to include an investment over 19 years of more than £170m (\$244m) and a doubling of Alla's annual production to around 409,000 units. Majority control would pass to the US company after three years,

Nevertheless, the Italian polit-ical and trade union world is beginning to rally around the Fi-at offer even before it is tabled.

Ford's decision to seek last night's meeting with Mr Craxi reflects a shrewd judgment as to where the final decision on Alfa's inture may be taken. IRI-Fin-meccanica, the state holding group which controls the strug-gling car company, has promised to reply to the Ferd proposals by November 7.

But there are no illusions that the final decision will be taken anywhere other than at the high-est political level. Italy's minister of state participation, Mr Clelio Datida, is claiming the final re-sponsibility, but Mr Craxi's office is making it clear that it will be broady shared among other ministers.

boosted by ients capital gains By Our New York Staff

TIME, the largest US publishing magazine and cable television group, reported that capital gains totalling \$352m substantially boost-ed third-quarter net income.

Time, which said on Monday it had agreed to buy leading textbook publisher Scott, Foresman for \$520m, announced income for the quarter of \$252m or \$3.98 a share on sales of \$914m. This compares with income of \$44m or \$70 cents a share on sales of \$847m last time.

on Sale3 or Sole7m last time. The pre-tax capital gains include \$316m realised from the sale of 20 per cent of the stock in American Television & Communications, the group's cable television subsidiary. The quarter also included a \$50m charge to cover relocation of sub-scription operations. The maga-zine division, the books and information services division and the programming division reported lower profits in the quarter, although cable television and book publishing profits were ahead.

The group said its interest in-come and interest expenses were significantly higher in the quarter, mainly because of the restructuring of American Television's balance sheet in connection with the public stock offering.

Profits at Time equipment group which employs major office equipment lines were about 60,000 in the US, is boosting down 28 per cent for the half. Mr its early retirement benefits for Kearns blamed weak demand for about 4,000 eligible salaried employ-reprographic and information sys-

Output rises at Beatrix

By Kenneth Marston in London

A FRESH ADVANCE in profits for the September quarter is reported by Bestrix Mines, the young gold producer in South Africa's Gencor group which is being worked as a division of Buffelsfontein.

Apart from the record gold price in the quarter. Beatrix has benefited from a 17% per cent rise in gold output as a result of increas both ore grade and tonnage milled.

Bestrix, together with Bracken, Leslie and Marievale - which also report higher earnings - says it has not entered into any further for ward gold sales contracts. At current price levels such action is not necessary for these mines although there is also the implication that they take a confident view of the market

Winkelhaak has also had a good quarter with the help of a higher ore grade, while other good in-creases in net profits include those of Grootylel, Unisel and Kinross.

defensive instrument againsgt a deterioration in the fixed-rate market. Nany dealers shorted the bond

immediately after its announce-ment, before they had examined its put option. This was because its 40 basis point yield margin over US Treasury bonds seemed tight relative to other five-year deals, especially since Denmark has been a frequent borrower in the Euromarket this year. However, later in tha day, the issue's price shot up to 1011 bid, against a 1014 issue

price. Morgan Stanley International,

EURODOLLAR bond prices were marked down yesterday morning ahead of the releasa of US retail figures for September. These figures failed to provide direction to the market and bonds ended up slightly lower on the day. Yesterday's main talking point was a new \$300m five-year issue of Denmark. This is bond which the investor can exchange for e floating-rate note [FRN]. It is designed as a [efensive instrument e entired at Link link of the investor can elefensive instrument e entired at Link link of the investor can issue of Denmark. This is for a floating-rate note [FRN]. It is designed as a lefensive instrument e entired at Link link of the investor can instrument e entired at Link link of the investor can interface (FRN). It is designed as a lefensive instrument e entired at Link conduction, most dealers

On reflection, most dealers feit the deal represented value. The market will now be watch-ing how the price settles down over tha next few days. Nicko Securities led e \$50m equity warrants bond for Suzzki Motor, while prices of equity warrants bonds gener-ally fell oo continuing concern about the Tokyo stock market. The five-year issue has an The five-year issue has an indicated 32 per cent coupon. Elsewhere in the Eurobond market, two Australian dollar issues were launched, following three last week. This created some concern that the market

was becoming oversupplied, although the lead-managers of yesterday's deals noted strong Continental demand.

Argentina grapples with bank reform

THE FINANCIAL centre of subject to 72 per cent reserve THE FINANCIAL centre of subject to 72 per cent reserve Buenos Aires is as busy and requirements whila interest frenetic as any of the world's rates have been largely con-major money markets. The sums trolled by the Central Bank, that pass through it may not The tightness of credit evail-be as great but are of e scale eble under this system, imple-which reflect the country's size mented in 1982, encouraged the as an important world producer development of a flourishing of beef and grains and a semi-industrialised nation of 30m inter-company market because people. Nonetheless, ask any of its origins, involving comeconomist in Argenting where reform is most urgently needed pany-to-company loans. Free of reserve requirements, it has in the economy, and the answer will probably be the banking

reserve requirements, it has been able to compete keenly with the legal banking system through substantially lower "spreads." The high level of reserve re-quirements was imposed to control the money supply system. The reason is that the system has failed as a means of mobilising domestic savings and channeling them into longcontrol the money supply growth effects in the economy term investment.

A first step towards improv-ing the system has been taken by a measure seeking to eliminate the flourishing parallel financial market in caused by the country running caused by the country running a strong balance of payments surplus from 1982 onwards— itself used to service the mush-rooming foreign dabt.

Shift of focus

Buenos Aires. It has been met with cautious optimism by bankers and businessmen — cautions, because the results take time to manifest them-The Central Bank however, selves, and because Argentinian through rediscounts to large state and private companies, the money market operators are re-markably adept in outwitting those who try to regulate them. Government and regional banks (which are the main financiers At the beginning of the month the new Central Bank of local governments) became the biggest lender in the finan-

cial system. At an Argentina banking conference in August, Mr Jose Luis Machinea, the new Central Bank president said directorate (executive board) issued a decree permitting banks and authorised financial institutions to reward any future increases in deposits at that the rediscounts represent 50 per cent of the total deposits competitive interest rates with only 3 per cent reserve requirein the system. ments on any deposits over 8,000 Australes (US\$734,000). Mr Machinea's first major re-

form will therefore shift the Until now, deposits have been focus of lending away from the

run into opposition though. The Foreign Bank Association in Argentina has protested at dis-criminatory measures which will require its member hanks to meintain trains the large of Central Bank and the parallel system, back to the formal bank-ing institutions. Yet tougher regulations will be needed. The spectacular export-finance will require its member banks to maintain twice the level of minimum capital as local banks. Local bankers compilan that the new regulations will be excessive. Profitable out-of-book operations, many in the parallel market, will now become more difficult to con-ceal. scandal centred around the directors of Banco Alas, the small co-operative bank, which defrauded the Central Bank of \$100m over the past year and e string of banking collapses in recent years, the most spectacu-lar of which was the Banco de Italia in 1985, have made that need shundantly clear.

Mr Alfredo Concepcion, the previous Central Bank presi-dent, has not yet been publicly questioned as, to how such a fraud managed to alip by un-noticed during bis presidency. He is also now accused of money supply targets will sharply reduce future Central Bank rediscounts and the avail-ability of on-lending in future debt removing in future noticed during his presidency. He is also now accused of involvement in fraud or criminal negligence by tha State Prosecutor for Adminis-trative Investigations, in another case impolying radis ability or on-lending in ruture debt renegotiation packages, according to Mr Eilbaum, the new director of the Central Bank. Long-term finance will therefore be even harder to obtain a the immediate future. another case involving rediscounts to a small private bank. He was a political appointee of Government hopes are that the financial reforms and economic stabilisation will create the conditions for the President Alfonsin and the repercussions may eventually be felt at the highest levels of government.

create the conditions for the development of a long-term capital market. According to Mr Eilbaum, "Our first priority is to institutionalise the financial system through the reforms. The second is to control inflation. Our economic An overhaul of the banking regulations is proposed in a new law which is to receive its new law which is to receive its first hearing in Congress this week. The draft being put for-ward by the Central Bank out-laws the parallel financial system, and vests the monetary authorities with considerably greater powers of supervision, investigation and control that policy has to concentrate on the latter because if we don't control inflation, there is no hope of a long-term capital market ever emerging in Argentina. If we do not develop such a market, there is little prospect for long-term growth." investigation and control that at present.

in taxation

hit by change

By Kenneth Marston in London

WHILE high gold prices have lifted September quarter working profits of the mines in South Africa's Ang-

of the finnes in sourt Arriva Ang-lovaal group, earnings have fallen at the net level owing to increased tax brought about by a reduction in tax-deductible capital expenditure.

Aggregate taxed profits of the four mines thus come out 24 per cent lower than in the previous three months at R75.5m (\$33.7m).

Allianz may raise up to **DM 900m**

By Our Financial Staff

ALLIANZ, the West German insurance group, may raise up to DM 900m (\$456m) through its planned issue of profit-sharing certificates. The company said the 3.2m certificates on offer would be formally priced today and that the issue would go ahead on October 27. Allianz expects the distribution of customers by January 31 1987 and the certificates to be aimed mostly at foreign fund managers. They are

expected to be priced somewhere between DM 200 and DM 300 each. by January 1. The rate cuts will cost the compa-The funds from the issue will be ny CS234m in revenue in 1987. used to create a strategic financial The CRTC said economic conditions have changed and Bell Canareserve for foreign investments. Alhanz has already named the US as da's financial performance is much a likely place for its next acquisi-tion. The company recently acquired the Italian group Binnione better. Maximum allowable rates of return on equity in 1985 and 1986 are 13.75 per cent and 13.25 per Adriatica di Sicurta and Cornhill Incent, while the actual rate earned by Bell Canada in 1985 was 14.2 per cent and will be 14 per cent this surance of the UK. Each holder of four Allianz com-

mon shares will be given options to year. draw on profit-sharing certificates. Allianz regards the notes as prefer-able for foreign investors to common stock since foreigners do not Allinz said earlier this month that its claims experience so far in 1986 had been satisfactory and that, on balance, good profits growth had been achieved. It said its 1986 resalts would reflect these twin fac-

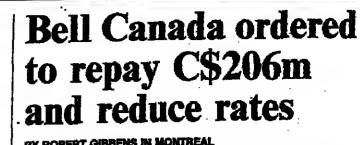

Approval for airline merger

THE US Department of Transporta-

tion has given tentative approval to Texas Air's acquisition of People Express, the troubled cut-price air-The decision seems likely to keep

People Express from filing for pro-tection from its creditors under Chapter 11 of the US bankruptcy code. On Monday it said it expected to report a substantial loss in the third quarter, including a \$55m defi-cit from Frontier Airlines, its subsidiary already operating under Chapter 11.

The DoT said the proposed merger, under which Texas would take on People and the assets of Frontier, was not likely "to substan-tially reduce competition."

BY ROBERT GIBBENS IN MONTREAL

BELL Canada, the Eastern Canada The CRTC found the new rates telecommunications utility owned would allow Bell Canada to mainby Bell Canada Enterprises of Mon- tain its service, while long-distance treal has been ordered to reimburse levels would be reduced to around elephone customers CS206m the same as in New York State. . . . .

A drystang on in sense profitability of its mining operations, the mine has sold forward in order to ensure the profitability of its mining operations, the mine has sold forward a portion of its expected gold production to July 1967. Prices range from R29 817 per kilogram in October 1986 to R31 129 per blogram in July 1967. The attention of shareholders is drawn to the fact that the above transactions may be closed out prior to maturity date, or rolled over at any time. The effect of transactions closed out during the quarter is brought to account in working revenue.

### **UK COMPANY NEWS**

### **Albert Fisher goes for more** US expansion as profits double

#### BY MIKE SMITH

**PHIT urges** 

rejection

of 160p

tender bid

By Paul Cheeseright, Property Correspond

Apex/Kupe operates as an investment trust with securi-

ties in Australia, New Zealand and the UK.

Broadly, the two companies are cash-rich shells. Apex has \$54m of property holdings with development plans worth \$300m. But it is an unknown quantity on the British market.

The terms of its tender offer for PHIT shares, worth a total of £37.47m, at 160p a

'may reconsider."

Property Holdings and Investment Trust (PHIT) shareholders will be urged to that pre-tax profits in the year to August 31 were more than reject the tender offer of 166p a share, plus a top-up pay-ment, from Apex Group of New Zealand, for 29.9 per cent doubled et £8.36m. Most of the expansion was accounted for by acquisitions but organic growth was put at 35 per cent.

of the equity. Mr Arthur John, the PHIT was put at 35 per cent. The company has also an-nounced its fifth purchase in the US since October 1984, that of the Los Angeles fruit and vegetable distributor Apex Wholesale Produce for a maxi-mum of \$6m (54.2m). In eddi-tion e one-for-three scrip issue is pronosed. chairman, said yesterday that the lines of his company's defence had still to be defined but he classified the offer as an unsatisfactory attempt to obtain a measure of back door control." posed.

He doubted whether Apex, controlled by Mr Graham Hamilton, had much of a con-tribution to make to the development of PHIT. In 1986, Fisher achieved a turnover of £116m against £84.9m in the previous year. Earnings per share rose 51 per cent to 11.5p. The PHFT shares yester-day andged through the basic tender price to 163p, a rise

The final dividend of 0.9375p on increased capital means the company will be paying out the equivalent of the 2.25p total it had forecast. For the current wear directors expect to mainof sp on the day. Aper is believed to be the second New Zealand company to stalk the British property sector, the first being Chase Corporation. In New Zealand the is the process of more year, directors expect to main-tain the 2.25p total because of the scrip issue, this would re-present e one-third increase. In its statement the board it is in the process of merg-ing with Kupe Investments, so that a single group with a market capitalisation of about NZ\$500m (£175.5m) will be said it believed the strength of management and operations would enable the group to

Albert Fisher Group, the broaden its product range inter- contracts on completion of the food distribution and service nationally. It was confident 1987 sale, will receive up to \$2.5m company, yesterday announced would present exciting oppor- depending on the profitability of Apex over the next two years. tunities for expansion.

For the year to end-August, • comment the UK food division saw pre-

It is just two years since Fisher acquired its taste for US companies but American marging of 9.3 per cent in 1985-6 show how easily it can digest them. With gearing et tax profits of £1.79m, up 46 per cent on 1985's £1.2m (adjusted only about 20 per cent it is only e question of time before the company goes on the acquisition trail again. The aim, however, is geographical balance and Fisher is also looking to broaden its base in the UK. On both sides of the Atlantic Fisher's strengths in health and convenience foods and its growing ability to add value to its products should ensure that its standing target for organic

### **Rockware edges further ahead**

Rockware Group, the glass Glass profits were further bit

glass production costs in line with reduced selling prices, sive recovery programme. Profit included £515,000 which

share, suggest that once a top-up payment is added, Apex is seeking a listed British vehicle. resulted from a reduction in pension contributions offset by British vehicle. Although Aper stated in its formal offer that it con-sidered a 29.9 per cent stake in PHIT a "strategic invest-ment," it added that it would not make a general bid for PHIT unless the offer is over-subscribed, in which case it "may reconcider." Group turnover fell from £56.62m to £55.83m, which excludes inter-company sales of

The company's glass interests reported turnover down from £47.61m to £46.25m, with operat-

ing profit before interest and exceptional items down signifi-cantly from £1.2m to £626,000. Sir Peter said Rockware's glass business had borne the brunt of the completion of the A top-up to the 160p would be made if Apex put in a general effer for PHIT which went unconditional, or if somebody else made an offer and Apex accepted for the shares it holds. new long-term furnace strategy which had involved the rebuilding of two furnaces at Portland and Wheatley, the running down of two furnaces at Bagley, and the re-opening of the mothballed furnace at Headlands,

to include the results of ecquisitions as if they had previously been part of the company). UK Distribution was 63 per cent ahead at £1.58m and the third division, US Food Services, showed growth of 26 per cent to reach £4.99m.

cerns turned in an increase in

Hockware Group, the glass Glass profits were further bit cerns turned in an increase in the plastics manufacturer, by exchange losses and debts turnover from £338,000 to showed a rise in pre-tax profits amonuting to £359,000 from £1.0im but operating profits from £164,000 to Sir Peter said the expected £109,000. Sir Peter said the company was now in the third year of its aggress. That Rockware had reduced its operations had failed to show operations had the place the show operations had the show operations had the place the show operations had the show operations had the place the show operations had the show operations ha sir Peter said that good ex-port performances by the Bur-well Reed and Kinghorn operations had failed to show through fally in the profits because of the poor price levels in the UK glass container Plastics reported an increase in turnover from £8.17m to industry.

in turnover from £8.17m to £8.56m, with operating profits up to £595,000 from £516,000. The success of the plastics division was largely due to the results of the Kingston and Norwich plants-figures showed Rockware's Golborne operation was not yet profitable. Rockware's engineering com-Rockware reported an extra-ordinary debit of £93,000 and attributable loss to ordinary shareholders amounted to £538,000. The loss per share fell from 2.33p in the restated results for the equivalent Rockware reported an extra-Rockware's engineering con- period last year to 1.83p.

### **Reborn Guthrie** doubles to £6.7m

IN ITS first figures since its re-appearance as a public com-pany, the Guthrie Corporation increased its pro-tax profits from a depressed £3.5m to £6.68m in the six months to June 30 1986.

Mr Jock Green-Armytage, managing director, said the dis-parity between the first and second half performance would be much less marked in 1986 in view of the unusually depressed figures for the first half of 1985. He was confident that results for the year as a whole would show a satisfactory improvement over the previous year. The improved first half results were largely attributable to good performances from the aviation services and automotive components divisions. Although turnover in the sviation services division declined from £58.01m to £41.45m, as e result

of reduced demand for new planes, the decision to broeden the range of Page's activities had brought improved results. In the electrical equipment division, Trench Electric con-tinued to perform well, but Ajax suffered from the declins in the steel and metal fabrica-tion industries in the US. Turn-over for this division fell from £28.76m to £21.68m.

The Australian companies in the textiles and floor coverings division faced difficult trading conditions, but Duralay further strengthened its position in the UK market and recently ex-tended its product range

division showed: aviation ser-vices £2.6m (£1.13m); electrical equipment £58,000 (£1.7m); firs protection equipment £2.13m (£1.22m); sutomotive compon-ents £2.52m (£845,000); textiles and floor coverings £855,000 (£842,000), and trading £41,000 (£138,000).

Mr Jock Green-Armytage. managing director of Guthrie Corporation

#### e comment

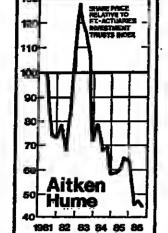

• comment These figures came only two months after the born-again Guthrie was re-listed on the market in e £123m flotation priced et 150p and those close to the action are well pleased. The aharp rise in profits from Aviation Services owes much to brokerage fees on the sale of two wide-bodied jumbo jets in this balf. The sale of four more of these circa £25m planes in the second half will push in the second half will push the division strongly ahead of Last year but the groop's major aircraft bag will then be empty leaving 1987 dependent on the performance of the solid but less exciting service activities. Automative commonents, thanks Group turnover overall was Group turnover overall was down from f163.81m to f148.73m, but operating profits for the opening half were f8.24m against f5.88m. A break-down of operating profits by impact of lower oil prices on division showed: aviation sersuffered fim from a stronger pound half against half and any weakening in sterling is seen as good news. Forecasts have stabilised around film pre-tax and the shares at 177p are likely to await a clearer 1987 picture before moving on

For the sector that it Fisher will pay \$3.5m cash high, but Fisher has excellent initially but the three vendors, prospects and there is scope who will enter two-year service for an even better rating.

Perstorp can report an improved income since last year, which means we have maintained a high level of profitability despite a significant increase in our investments for the development and introduction of new products.

During 1985/86 our sales increased by 14% (SEK 3,930m), and Perstorp Chemitec and Perstorp Compounds in particular showed significant rises, partly as a result of some recent acquisitions.

#### A Growing Company

Perstorp made several beneficial acquisitions during the year. By gaining La Bakelite SA in France, for instance, we not only acquired one of Europe's largest manufacturers of resins and phenolic moulding compounds - we also added around SEK 250m to our consolidated sales on an annual basis. In addition, by acquiring Lumac BV of the Netherlands and ServoChem AB of Sweden, we have expanded our range of analytical systems for the food and animal feed industries.

Meanwhile, Pernovo (our new business development company) has bought 67% of all the shares in Guided Wave Inc, USA, a company involved with process control systems and instruments, and 49% of the shares in Cubed Composites Inc, USA, who make composite materials.

Pernovo has taken a 49% share in PRELIMINARY Atos Medical AB, Sweden, who manufacture medical products for implantation into the human body.

We expect these acquisitions to strengthen our position in existing markets and to provide a firm base for further developments in new technologies.

#### Investing for Tomorrow

Capital investments remained high during the fiscal year, with investments in property, plant and equipment amounting to SEK 265m, including corporate acquisitions. The largest of these was in Skaraplast AB of Sweden, who have built a new factory as well as a lacquering facility and some additional injection moulding machines. These are designed to meet the increased demands of the automotive industry.

Perstorp AB, S-284 80 Perstorp, Sweden

Perstorp is an international corporation which has chosen to concentrate on creative chemistry in the areas of specialty chemicals, plastic components, surface materials and bio-technology. Within these fields we hold a leading position in several "niche" markets.

We have production companies in 11 countries throughout Europe, North America and Iatin America and over 5,000 employees worldwide,
